 Import/Install BC License2

 Install TRIMIT License for all environments3

 Verify TRIMIT License.....4

INTRODUCTION

To work with TRIMIT you need to install two licenses:

- The Microsoft Dynamics 365 Business Central License (from hereof: BC License) in case of an on-premise installation.
- The TRIMIT License (from hereof: TRIMIT License).

This document will explain to you how to install the TRIMIT License.

For some customers TRIMIT is also handling the BC License (on-premise), if so, you can also download this license [here](#).

The BC License file is by Microsoft named: *PSBC Account Number.flf*.

Example: *6119246.flf*

THE TRIMIT LICENSE

The TRIMIT License file is necessary for all Customer Installations and works together with the Dynamics 365 Business Central License file/assigned users in Cloud.

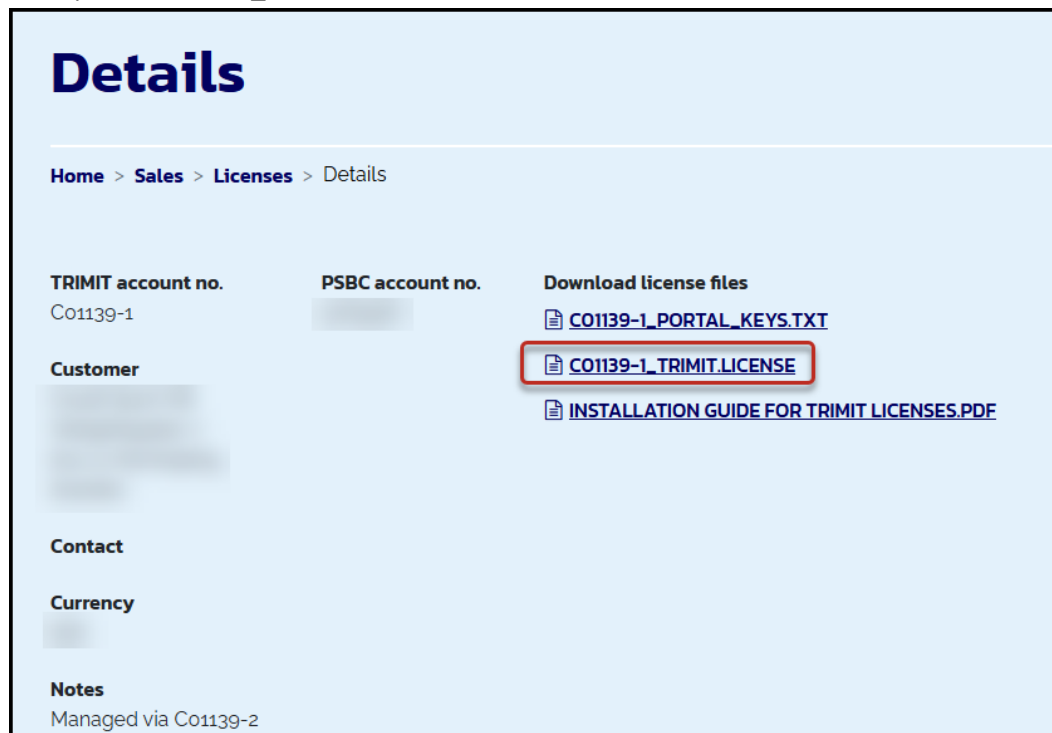

You can download the **TRIMIT License File** from MyTRIMIT [here](#) based on the order you placed for TRIMIT.

The TRIMIT License is a secondary license file controlling access to TRIMIT modules within BC.

This file is not to compare with the BC License file, and it is imported to the database in a different way.

The name of the TRIMIT License: *TRIMIT Customer Number-1_TRIMIT.LICENSE*

Example: *C012345-1_TRIMIT.LICENSE*

TRIMIT RELEASES

TRIMIT 26.1 is running on **Microsoft Dynamics 365 Business Central on-premises 2026 release wave 1**.

IMPORT/INSTALL BC LICENSE

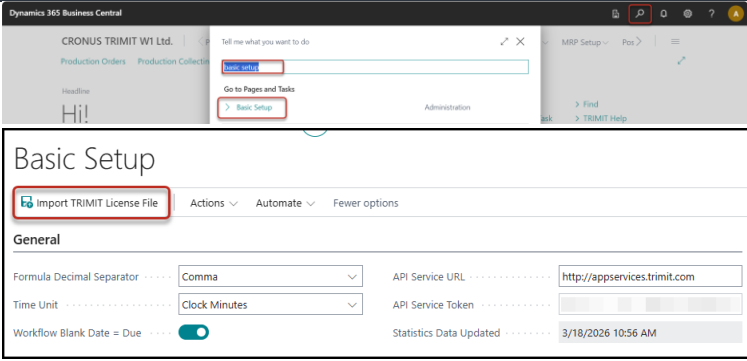

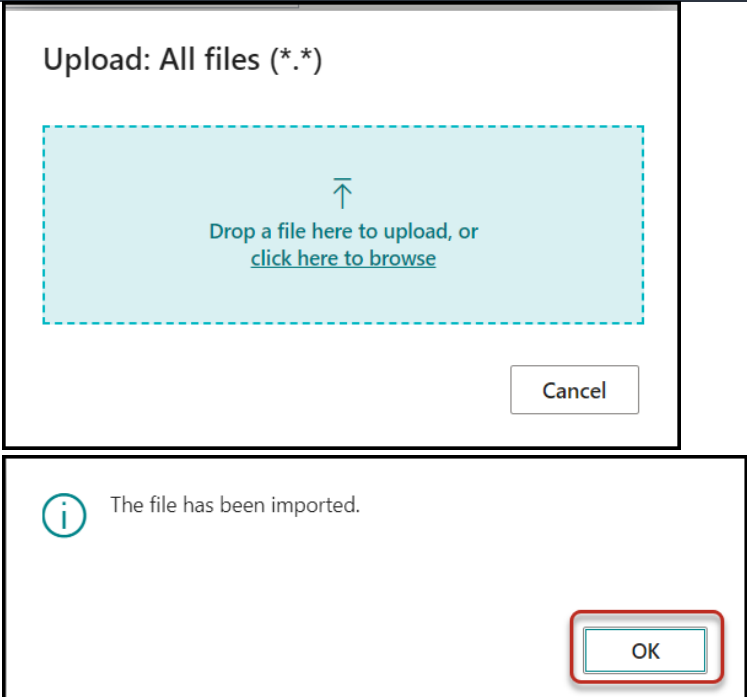

See [Import-NAVServerLicense \(Microsoft.Dynamics.Nav.Management\) - Dynamics NAV | Microsoft Learn](#) how to install the BC License in a Cloud Installation.

See [Upload the License File - Business Central | Microsoft Learn](#) how to install the BC License in an On-premises installation.

After you created the **Microsoft Dynamics 365 Business Central** environment, the next step is to import/upload the **BC License** file that is supplied by Microsoft or TRIMIT.

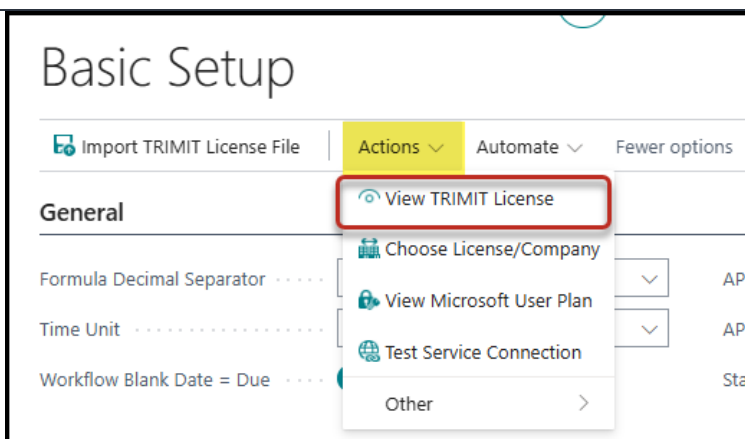

INSTALL TRIMIT LICENSE FOR ALL ENVIRONMENTS

The **TRIMIT License** file needs to be imported in on-premises environments and well as in cloud environments.

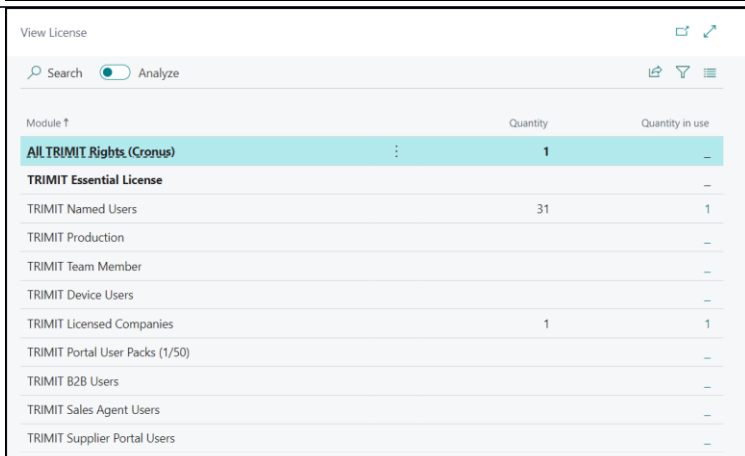

1. Open the TRIMIT Database and go to Basic Setup by using Search. 2. Click Import TRIMIT License File	
3. Browse and select the TRIMIT License, the file will be installed automatically. I.e. <code>C012345-1_TRIMIT.LICENSE</code>	

VERIFY TRIMIT LICENSE

1. If you click **Actions, View TRIMIT License**, you can see the content of the **TRIMIT License**.

Example:

The screenshot shows the 'View License' screen. It contains a table with the following data:

Module	Quantity	Quantity in use
All TRIMIT Rights (Cronus)	1	-
TRIMIT Essential License		-
TRIMIT Named Users	31	1
TRIMIT Production		-
TRIMIT Team Member		-
TRIMIT Device Users		-
TRIMIT Licensed Companies	1	1
TRIMIT Portal User Packs (1/50)		-
TRIMIT B2B Users		-
TRIMIT Sales Agent Users		-
TRIMIT Supplier Portal Users		-

Besides importing the TRIMIT License, you also need to Assign it to the right Companies. This can be done via **Actions, Choose License/Company**.
