SUSTAINABILITY 26.2

This Document contains information regarding the installation of **TRIMIT Sustainability 26.2** for **Microsoft Dynamics 365 Business Central 2026 release wave 2**, with at least **Build 29.0.XXXXX.XXXXX**.
This document is for Developers and experienced Consultants, hence the instructions do not include detailed menu paths, as it is expected that handling Business Central is common knowledge.
The package for **TRIMIT Sustainability 26.2.XXXXX** can be downloaded here or via AppSource.
The package for **TRIMIT Sustainability Data and Test 26.2.XXXXX** can be downloaded here.

The installation of TRIMIT Sustainability requires the following actions:

- Installation of **TRIMIT 26.2.XXXXX** according to the **Installation Guide for TRIMIT 26.2**
- Installation of **TRIMIT Data and Test 26.2.XXXXX** according to the **Installation Guide for TRIMIT 26.2**
- Publish and Install the **TRIMIT Sustainability 26.2.XXXXX** Application.
- Publish and install the **TRIMIT Sustainability Data and Test 26.2.XXXXX** Application if you want to include (English) demo data regarding Sustainability – but this is only applicable if you also created the TRIMIT Demo Data by using the **TRIMIT Data and Test 26.2.XXXX.**

This document will guide you through these processes. All files (besides the Business Central installation itself) can be found on MyTRIMIT.

NOTE
This document describes a new installation. For the upgrade of an existing TRIMIT installation, please look in the Upgrade Instructions document.

INSTALLATION FOR THE TRIMIT APP

See the **Installation Guide for TRIMIT 26.2.**
You need to install the **TRIMIT** App and the **TRIMIT Data and Test** App.

MICROSOFT DYNAMICS 365 BUSINESS CENTRAL LICENSE FILE

For running **TRIMIT Sustainability** Application, it is necessary to get a new License.
Request this via MyTRIMIT https://my.trimit.com/sales/licenses/ in case of Embedded Licenses.

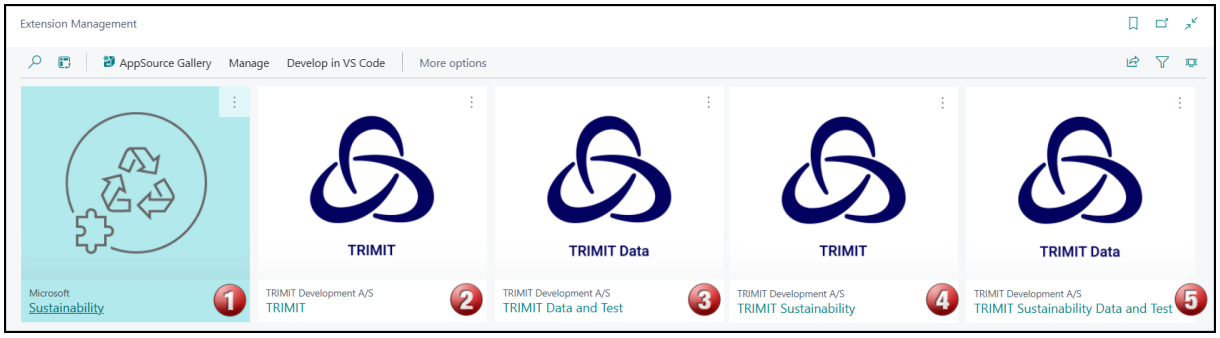

TRIMIT SUSTAINABILITY 26.2

Content of the package:

1) **TRIMIT Sustainability 26.2.XXXXX** Application (No. 4 in the picture below)
2) **TRIMIT Sustainability Data and Test 26.2.XXXX** Application (No. 5 in the picture below)
3) **Release documentation**

INSTALLATION PROCESS

1. Publish and Install the **TRIMIT Sustainability** Application (No. 4 in the picture below).

2. Publish and Install the **TRIMIT Sustainability Data and Test** Application (No. 5 in the picture below), if you also want TRIMIT Demo Data specifically for Sustainability.

See the following link for how to install the necessary extensions:
https://docs.microsoft.com/en-us/dynamics365/business-central/dev-itpro/developer/devenv-how-publish-and-install-an-extension-v2

LOCALIZATIONS

Be aware that the Localizations are now handled in the Microsoft **Base Application**.

PRECONDITIONS

- You need to have the **Sustainability** App of standard Business Central installed (No. 1).
- You have completed the installation of the **TRIMIT** App (No. 2).
- You have completed the installation of the **TRIMIT Data and Test** App (No. 3).

DEMO COMPANY

INSTALLATION DEMO DATA PROCESS FOR DEMO PURPOSES

1) Install the **localized** Microsoft Dynamics 365 Business Central on premises 2026 release wave 2, regardless the Update from Microsoft with **at least** Build **29.0.XXXXXX.XXXXXX**.
   Follow the instructions provided by Microsoft.
2) Make sure, you also import/have the default demo data of standard Business Central in the database.
3) Make sure, you already did create the Demo Data with the **TRIMIT Data and Test** App before creating the demo data with the **TRIMIT Sustainability Data and Test** App.
4) See separate ***Guide for Creation of TRIMIT Data.***

The Demo Data that can be created with the separate **TRIMIT Data and Test** App and the **TRIMIT Sustainability Data and Test** App are used to create specific TRIMIT Data for the Demo Scripts and White Papers and can easily be used for demos to prospects or customers.

You can find the Demo Scripts here.
You can find the White Papers here.

INSTALLATION OF TRIMIT ON ACTIVE TRIMIT DATABASE

If you have a Customer Database on an BC13R2 or older version of TRIMIT and want to upgrade to TRIMIT 26.2, you need to consider the following:

1. Upgrade tools from TRIMIT BC13R2 to BC21 are available on MyTRIMIT.
2. Prepare already the database by re-coding the customization into Extensions and Codeunit Calls into Publishers.
3. After that the upgrade to the latest TRIMIT 23.1.XXXXX (based on BC22) is a simple upgrade. This step is however necessary regarding the TRIMIT Permission Sets, that are handled differently in as off TRIMIT 22.2.
   Therefore, the old TRIMIT Permission Sets need to be 'converted' to Permission Sets with **Type** *User-Defined,* otherwise they will be deleted when upgrading to TRIMIT 23.1.
4. After that the upgrade to the latest TRIMIT 26.2. is a simple upgrade.
