Collapse an Assortment.....	33

INTRODUCTION

TRIMIT Assortments enables the user to combine different variants of a Master within a specific “package”: The **Assortment**.

An Assortment will be bought/produced as a whole “package” and will be sold as a whole “package”.

It is also possible to “explode” an Assortment into the individual Items that it contains.

Because the functionality of **TRIMIT Assortments** is mainly used in Fashion, this White Paper will be focused on the Color/Size combinations.

You can create Assortments for a Master based on 1 Color and several Sizes, but also based on several Colors and several Sizes.

You can set it up for using a specific Matrix exclusively for the Assortments (Assortment Matrix), but also as part of the regular Matrix of Colors or Sizes.

The audience for this document is the Consultant or very skilled User.

It will only describe the TRIMIT fields/functionality and not the standard Business Central fields/functionality.

Be aware of not changing settings and parameters in a live database without consulting the implementing partner.

The functionality described is the functionality as of **TRIMIT 22.2 for Business Central W1 BC21.X**.

The pictures in this White Paper are based on the demo database for **TRIMIT 22.2**, which is based on Microsoft Dynamics 365 Business Central 2022 Release Wave 2, in the demo company **CRONUS TRIMIT W1 Ltd.** (based on CRONUS International Ltd. of Microsoft Dynamics 365 Business Central).

COMPONENTS

TRIMIT Assortments contains the following objects:

The tables	6037118	<i>trm Assortment</i>
	6038139	<i>trm Portal Assortment Content</i>
The pages	6037125	<i>trm Matrix Orders Assort List</i>
	6037134	<i>trm Assortments</i>

Besides these special Assortment objects, many other objects have been changed regarding the Assortments, like i.e., the Lines of Sales Documents and Purchase Documents where the **Type** of the Line can also be *Assortment Matrix*.

ONE COLOR / MANY SIZES ASSORTMENT

I.e., an Assortment with 1 x S, 2 x M, 2 x L and 1 x XL for a color of a Master.

This can be setup as a separate VarDim Type, but also as special Sizes in a Sizes VarDim Type.

SETUP ASSORTMENTS IN A SEPARATE VARDIM TYPE

When you want to create a **VarDim Type** specifically for Assortments, you need to make a connection to the actual Sizes VarDim Type from which you choose the Sizes and Quantities that are in the Assortment.

Example: a VarDim Type for Assortments related to a Sizes VarDim Type called *SIZE_C* could look like this:

VarDim Type Card

AST_SIZE_C

Variant Table / Options | More options

 Add Filter:

Type must be *Code* and in **Assortment VarDim Type** you need to enter the VarDim Type which is the related Sizes VarDim Type for which you want to create the Assortments for.

When you click **Variant Table/Assortment** you can enter the Codes and the Descriptions within the VarDim Type *AST_SIZE_C*

CODE

The Code for this Assortment.

The number of digits of this Code must be the same as the number of digits of the Values of the related Sizes VarDim Type and make sure that the Codes of the Assortments do not interfere with the Values you have used in the related Sizes VarDim Type.

DESCRIPTION

A Description for this Assortment.

Be aware that this Description will become part of **Description 2** of the special Assortment Items that can be created for a Master.

SHORT DESCRIPTION

A Short Description for this Assortment that might be used as name for the Columns in a Matrix based on the **Field Used in Matrix X-Axis Description** of the VarDim Type.

QUANTITY IN ASSORTMENT

Will be calculated by the System based on the total pieces/units are in this Assortment.

NUMBER OF VARIANTS

In the Field **Number of Variants**, you can click the **three dots**.

Mark	Value ↑	Assortment	Blocked	Name
→	☒	01	☐	XS
	☒	02	☐	S
	☒	03	☐	M
	☒	04	☐	L
	☐	05	☐	XL

	☐	07	☐	3XL
	☐	08	☐	4XL
	☐	09	☐	5XL
	☐	AA	☒	XS-L / 1221
	☐	BB	☒	S-XL / 1221
	☐	CC	☒	M-XXL / 1221
	☐	DD	☒	XS-L / 1222
	☐	EE	☒	S-XL / 1222
	☐	FF	☒	M-XXL / 1222
	☐	GG	☒	XS-XL / 12211
	☐	HH	☒	S-XXL / 12211
	☐	II	☒	XXL-5XL / 1221
	☐	JJ	☒	XXL-5XL / 1222
	☐	KK	☒	XL-5XL / 12211
	☐	LL	☒	XL-5XL / 12221
	☐	MM	☒	M-5XL / 1233211
	☐	NN	☒	XS-5XL / 111111111

In this page you need to **Mark** the Sizes that are in the Assortment. Be aware that you do not choose the **Values** with a checkmark in **Assortment** that represent the Assortments itself.

Press **Esc** to go back to the Assortments page. The **Number of Variants** is now based on the number of Sizes that you marked.

Code ↑	Description	Quantity in Assortment	Number of Variants
→ AA	XS-L / 1221	6	4
BB	S-XL / 1221	6	4
CC	M-XXL / 1221	6	4
DD	XS-L / 1222	2	1
EE	S-XL / 1222	7	4
FF	M-XXL / 1222	7	4

Via **Related, Quantity in Matrix**, you can now enter the quantities per marked Size that you want to have in the Assortment.

NOTE

You can only create 1 VarDim Type for Assortments per Sizes VarDim Type (Field **Assortment VarDim Type** in the Assortment VarDim Type)

HOW TO CONNECT ASSORTMENTS TO A MASTER

Once you created the Assortments, you can connect them to your Masters.

NOTE

In that case, you already need to make sure, that all the regular Sizes that you have chosen in the Assortments are available for the Master as well.

Therefore, based on the above picture, where you see Assortments with Sizes XS – 5XL, it means, that the Master that could have Assortment AA and KK, should be able to have the Sizes XS – 5XL.

That is done by clicking **Actions, Matrix, Matrix, Matrix**.

In the Master Card click **Actions, Matrix, Assortments, Assortment** to choose the applicable Assortments:

Pressing **<Enter>** on the first field **Relation 2 Name** makes sure that the line is created automatically, and you can select the **Options Var1** (the colors for which you want to use Assortments) and the **Options Var2** (the different Assortments – like AA - that are applicable).

Edit - - Assortment Matrix - Relation 1 NO. 2110 - Mia Blouse							
Search + New Edit List Delete Open in Excel Related Fewer options

The Items that might be created automatically – based on the parameter **Create All Matrix Related Items** in the Inventory setup – will automatically get some specific content.

Direct Unit Cost		Calculated Unit Costs

Unit Price Calculation Method Items in Assortment

Management Level Unit Price 0

VarDim Addition to Unit Price No

Commission / Bonus

Item Commission Group

Item Bonus Group

Unit Price Calculation Method will by default be filled with *Items in Assortment*.

In other words: The **Direct Unit Cost** and the **Unit Price** for the Assortment Items will simply be based on the sum of the Direct Unit Costs and Unit Prices of the underlying Items. Of course, this also influences the **Unit Cost** (based on the **Direct Unit Cost**) of the Assortment Items.

I.e., if 1 Item has a **Direct Unit Cost** of 30, and there are 6 pieces in an Assortment, the **Direct Unit Cost** for the Assortment becomes $30 \times 6 = 180$.

If this is not what you want, you need to change these two fields manually in the Item Cards.

In that case, you can enter the **Last Direct Cost** and (Standard/Calculated) **Unit Cost** on the Assortment Items manually.

And enter the Sales Prices specifically for these Assortment Items by using the **Search Expression** or **Formulas** in the Master Sales Prices, or by entering the Sales Prices related to the individual Assortment Items.

Be aware, that if you use the regular Sizes VarDim Type (i.e., **SIZE_C**) in the **Search Expression** of the Sales Prices or Purchase Prices for a Master, you will – by default – only see the regular Sizes if you click **Search Table Lines**.

SETUP ASSORTMENTS IN A SIZES VARDIM TYPE

Besides using the Assortments in a specific **Assortment Matrix** Line on your documents, you can also use Assortments as extra “Assortment Sizes” in the regular Sizes VarDim Type, and therefore in a regular **Matrix** Line on your documents.

The advantage of this setup is that when you open the Matrix in a Sales-/Purchase Document, Production Collecting Order, or the Item Journal, you will not only see the regular Sizes, but also the Assortment Sizes in the columns. The **Type** of the Line in your documents/journals, however, will simply remain *Matrix*.

For setting up these Assortment Sizes, you can make use of the [Setup for a Separate VarDim Type](#). This would mean, that for every Master with an Assortment Size AA, you would always have the same content, and you only have to specify the content of an Assortment once.

Without a special VarDim Type for Assortments, you are still able to add Assortment Sizes in a regular Size VarDim Type, but in that case, for every Master, you need to specify what the content is for a specific Assortment.

This means, that Assortment Size AA could have a different content for Master 1 as for Master 2.

The disadvantage of this individual setup might be that you have to specify the content of every Color/Assortment Size for every Master individually, but when using the [Setup for a Separate VarDim Type](#) you only have to set it up once in the specific Assortment-VarDim Type.

But you can also make use of the **Matrix Distribution** to make sure that you always have the same quantities of the individual Sizes for a specific Assortment.

WHEN USING SEPARATE CODE VARDIM TYPE

If you have setup a VarDim Type of **Type Code** as described in [Setup for a Separate VarDim Type](#) and want to create the same Assortments in a regular Size VarDim Type, you only need to select those Assortment Sizes.

After setting up the *Code* VarDim Type, and created the Assortments, it might look as follows:

Edit - - - No. - -										
Variant 1			Variant Description			Line Quantity				
AA	36-42	1221	6	1	2	2	1	-	-	-
BB	40-48	12211	7	-	-	1	2	2	1	1

In that case, in **VarDim Type SIZE_EU**, you will now see the Sizes **AA** and **BB** with a checkmark in **Assortment**:

VarDim Variant Option No. SIZE_EU - 21											
Value ↑	Description	Short Description	Assortment	Bloc...	Color Reference	RGB Code	No Image	Picture	Attribute Value	Group 0 Name	Group 1 Name
36	36	36	☒	☐	-		☐	+	36	36-42	
38	38	38	☐	☐	-		☐	+	38	36-42	
40	40	40	☐	☐	-		☐	+	40	36-42

60	60	60	☐	☐	-		☐	+	60	52-60	
AA	36-42 1221		☒	☐	-		☐	+			
BB	40-48 12211		☒	☐	-		☐	+			

HOW TO CONNECT ASSORTMENT TO A MASTER

In any Master that has a **VarDim Type SIZE_EU** for the Sizes, you are now able to add the Assortment Sizes **AA** and **BB**. I.e.,

In Master **2010**, you click **Actions, Matrix, Matrix, Matrix** and in **Options Var 2** you add the Assortment Sizes **AA** and **BB**.

Based on the content of the Assortment – which was created in the **Code VarDim Type AST_SIZEEU**, you can already see the content of the Assortment Sizes.

I.e., Item 201001AA, when clicking **Home, Bill of Materials**, and choosing **Item BOM**, I see:

Type	Part Item No.	Group Filter	No.	Description	Description 2	Quantity per	Position 1	Unit of Measure Code	Search Expression	Quantity per in Search Table	Formula
→ Matrix			2010	Amelia Trousers		6				☐	
Item			20100136	Amelia Trousers	White,36	1		PCS		☐	
Item			20100138	Amelia Trousers	White,38	2		PCS		☐	
Item			20100140	Amelia Trousers	White,40	2		PCS		☐	
Item			20100142	Amelia Trousers	White,42	1		PCS		☐	

Regarding Unit Cost, Sales Prices, Purchase Prices, it works the same way as described earlier on pages 6, 7 and 8.

HOW TO USE THESE ASSORTMENTS

Now in a Document, you can simply enter a **Matrix** Line, in which you can see the regular Sizes and the Assortment Sizes. I.e.,

Edit - Sales Order 0100004 - No. 2010 - Amelia Trousers -											
Search Edit List Matrix Inventory Profile More options											
Variant 1	Variant Description	Line Quantity	36	38	40	42	44	46	48	AA	BB
→ 01	White		[7]	[14]	[19]	[18]	[12]	[7]	[10]	[0]	[0]
99	Black		[0]	[3]	[5]	[5]	[4]	[3]	[3]	[0]	[0]

And entering an *m* or *M* in a cell, can show you the content of the Assortment.

WHEN NOT USING SEPARATE CODE VARDIM TYPE

When you want to add Assortment Sizes to a regular Sizes VarDim Type, you can simply create extra Values (Variants) in the Sizes VarDim Type with a checkmark in the field **Assortment**.

Again, it is important that the **Description** of the **Value** tells you something regarding the content of the Assortment.

I.e.

VarDim Variant Option No. SIZE_A - 23

▼

II	XXL-5XL 1221	II	☒	
→ ZZ	⋮ M-XXL 1221 - mixed Colors	ZZ	☒	

Now, the content of an actual Assortment is NOT setup via the VarDim Type, but via the Master to which you connect this specific Sizes VarDim Type.

HOW TO CONNECT ASSORTMENT TO A MASTER

Once you created the Assortment Sizes, you can connect them to your Masters.

In the Master Card go to **Actions, Matrix, Matrix, Matrix**:

Pressing **<Enter>** on the first field **Relation 2 Name** makes sure that the line is created, and you can select the **Options Var1** (the Colors for which you want to use the regular Sizes and the Assortment Sizes) and the **Options Var2** (the different regular Sizes and the Assortment Sizes).

Mark	Value ↑	Assortment	Blocked	Name
☒	01	☐	☐	XS
☒	02	☐	☐	S
☒	03	☐	☐	M
☒	04	☐	☐	L
☒	05	☐	☐	XL
☒	06	☐	☐	XXL
☒	07	☐	☐	3XL
☐	08	☐	☐	4XL
☐	09	☐	☐	5XL
☒	AA	☒	☐	S-XL 1221
☒	BB	☒	☐	S-XXL 1221
☒	CC	☒	☐	M-XXL 1221
☒	DD	☒	☐	M-3XL 1221
☒	EE	☒	☐	L-3XL 1221
☐	FF	☒	☐	L-4XL 1221
☐	GG	☒	☐	XL-4XL 1221
☐	HH	☒	☐	XL-5XL 1221
☐	II	☒	☐	XXL-5XL 1221

After you have marked the applicable Values (Sizes and Assortment Sizes), click **Close**.

To use the regular Sizes in your Assortment Sizes, you need to select the regular Sizes (XS – 5XL if applicable) as well, so you are not able to choose only the Assortment Sizes!

Now we still need to determine the content of the Assortments itself.

In this page, you need to click **Related, Matrix Master, Create/Maintain Assortment**.

Variant 1	Variant Description	Line Quantity	XS	S	M	L	XL	XXL	3XL	AA	BB	CC	DD	EE
01	White		-	-	-	-	-	-	-	[6]	[7]	[6]	[7]	[6]
30	Yellow		-	-	-	-	-	-	-	[6]	[7]	[6]	[7]	[6]
65	Lawn Green		-	-	-	-	-	-	-	[6]	[7]	[6]	[7]	[6]
99	Black		-	-	-	-	-	-	-	[6]	[7]	[6]	[7]	[6]

In every Matrix Cell of an Assortment Size, you need to enter an *M* or *m* to fill the actual content of the Assortment.

I.e., if you enter *M* in the Matrix Cell of *White/AA* and click **<Enter>** you can fill the quantities for the *White/AA*:

Variant 1	Variant Description	Line Quantity	XS	S	M	L	XL	XXL	3XL	AA	BB	CC	DD	EE
01	White	6		1	2	2	1							
30	Yellow													
65	Lawn Green													
99	Black													

This must be done for every Color/Size combination; so, based on the pictures above with 4 colors and 5 Assortment Sizes: 20 times!

As you can see; the content of the Color/Assortment is related to the Master; not to a specific VarDim Type. Therefore, using the [Setup Assortments in a Sizes VarDim Type](#) means that you have to determine the content of every Color/Assortment combination in every Master where you want to use these Assortment Sizes.

Based on the selected Colors and Sizes via **Actions, Matrix, Matrix, Matrix** in the Master List/Card, the Items that might be created automatically – based on the parameter **Create All Matrix Related Items** in the Inventory setup – will get automatically some specific content, the same way as in [Setup Assortments in a Separate VarDim Type](#):

Direct Unit Cost Calculation Method will by default be filled with *Items in Assortment*.

Unit Price Calculation Method will by default be filled with *Items in Assortment*.

In other words: The **Direct Unit Cost** and the **Unit Price** for the Assortment Items will simply be based on the sum of the Direct Unit Costs and Unit Prices of the underlying Items. Of course, this also influences the **Unit Cost** (based on the **Direct Unit Cost**) of the Assortment Items.

I.e., if 1 Item has a **Direct Unit Cost** of 30, and there are 6 pieces in an Assortment, the **Direct Unit Cost** for the Assortment becomes $30 \times 6 = 180$.

If this is not what you want, you need to change these two fields manually in the Item Card.

In that case, you can enter the **Last Direct Cost**, (Standard/Calculated) **Unit Cost** on the Assortment Items manually and make sure that you have entered the Sales Prices specifically for these Assortment Items by using the Search Expression or Formulas in the Master Sales Prices, or by entering the Sales Prices related to the individual Assortment Items.

Be aware, that if you use the regular Sizes VarDim Type in the **Search Expression** of the Sales Prices or Purchase Prices for a Master, you will – by default – only see the regular Sizes if you click **Search Table Lines**. You need to enter the Assortment Codes manually to be able to enter the **Unit Price**.

Inactive	Not Valid	SIZE_A_T	Casual Sizes and Assortments	Unit Price
☐	☐	01	XS	6,0
☐	☐	02	S	6,0
☐	☐	03	M	6,0
☐	☐	04	L	6,0
☐	☐	05	XL	6,0
☐	☐	06	XXL	6,0
☐	☐	07	3XL	6,0
☐	☐	AA	S-XL 1221	30,0
☐	☐	BB	S-XXL 12211	36,0
☐	☐	CC	M-XXL 1221	30,0
☐	☐	DD	M-3XL 12211	36,0
☐	☐	EE	L-3XL 1221	30,0

HOW TO MAKE USE OF THE MATRIX DISTRIBUTION

If the quantities per Size in an Assortment should always be the same not depending on the Colors, you can also make use of the **Matrix Distribution** of the Sizes VarDim Type.

Therefore: go to the **VarDim Type** List, select the Sizes VarDim Type, and click **Actions, Distribution, Matrix Distribution**

Type	No. ↑	VarDim Variant	VarDim Type Name	Dimen...	Limited usage	VarDim Master
Variant	SIZE_A	23	Casual Sizes and Assortments	No	VarDim Master	
Variant	SIZE_C	20	Casual Sizes XS - 5XL	No	VarDim Master	
Variant	SIZE_FU	21	European Sizes 36 - 60	No	VarDim Master	

Suppose, Assortment AA is S-XL 1221 you can create a Matrix Distribution for Code AA:

Code ↑	Description	Total Quantity	XS	S	M	L	XL	XXL	3XL
AA	S-XL / 1221	6,00		1	2	2	1		

And the moment you need to enter the quantities per Color/Assortment Size for a Master, as shown on the previous page, you can use the **Matrix Distribution Code AA**, to quickly fill the quantities per Size that are in that Assortment.

Variant 1	Variant Description	Line Quantity	Matrix Distribution Code	XS	S	M	L	XL	XXL
03	Snow								
21	Light Blue								
25	Navy	6	AA		1	2	2	1	

NOTE

When using the **Matrix Distribution**, it is convenient to use the same codes for the Matrix Distribution as the Assortment Size (AA -> AA)

HOW TO SEE THE CONTENT OF AN ASSORTMENT ITEM

The underlying Items of Assortment Items can also be seen in the Bill of Materials of the Assortment Items (via **Process, Bill of Materials**):

HOW TO USE THESE ASSORTMENTS

These Assortment Sizes can simply be used as a regular Color/Size in a Matrix.

In the Lines of the Sales Document, Purchase Document and Production Collecting Order you can choose **Type Matrix** to enter the quantities per Color/Assortment of a Master.

In the Lines of the Item Journal, Reclassification Journal and Physical Inventory Journal you can choose **Matrix Type Matrix**, to enter the quantities per Color/Assortment of a Master.

I.e., in the Matrix of a Sales Order:

MANY COLORS / MANY SIZES ASSORTMENT

The previous explained Assortments were all Assortments based on 1 Color and quantities for many Sizes. You can however also create Assortments based on a combination of several Colors and several Sizes from a Master.

This setup is comparable with the setup of the Assortments in a Size VarDim Type [When Not using Separate Code VarDim Type](#) but now you will also have Colors in the Colors VarDim Type with a checkmark in **Assortment**.

SETUP ASSORTMENTS IN A SIZES VARDIM TYPE

When you want to add Assortment Sizes to a regular Sizes VarDim Type, you can simply create extra Values (Variants) in the Sizes VarDim Type with a checkmark in the field **Assortment**.

Again, it is important that the **Description** of the **Value** tells you something regarding the content of the Assortment.

I.e.

VarDim Variant Option No. SIZE_A - 23 🔍 ⌵ + New 🗑 Edit List ⋮

SETUP ASSORTMENTS IN A COLORS VARDIM TYPE

When you want to add Assortment Colors to a regular Colors VarDim Type, you can simply create extra Values (Variants) in the Colors VarDim Type with a checkmark in the field **Assortment**.

Again, it is important that the **Description** of the **Value** tells you something regarding the content of the Assortment.

Value ↓	Description	Short Description	Assortment	Color Reference	RGB Code	No Image	Picture	Attribute Value	Group 0 Name
ZZ	Red/White/Blue Assortment	R/W/B	☒			☐	+	Mixed	
YY	Red/White Assortment	R/W	☒			☐	+	Mixed	
XX	Yellow/Blue Assortment	Y/B	☒			☐	+	Mixed	
MC	Mixed Colors	MC	☒			☐	+	Mixed	
99	Black	Black	☐			☐		Black	
92	Charcoal	Charcoal	☐			☐		Black	
90	Grey	Grey	☐			☐		Black	
80	Purple	Purple	☐			☐		Blue	
75	Magenta	Magenta	☐			☐		Red	
73	Pink	Pink	☐			☐		Red	
72	Fire Red	Fire Red	☐			☐		Red	
70	Red	Red	☐			☐		Red	
65	Lawn Green	Lawn	☐			☐		Green	
60	Forest Green	Forest	☐			☐		Green	

Now, the content of an actual Assortment (for Colors and Sizes) is NOT setup via the VarDim Type, but via the Master to which you connect this specific Colors VarDim Type and Sizes VarDim Type.

HOW TO CONNECT COLOR AND SIZE ASSORTMENTS TO A MASTER

Once you created the Assortment Colors and Sizes, you can connect them to your Masters.

In the Master Card go to **Actions, Matrix, Matrix, Matrix**:

Pressing **<Enter>** on the first field **Relation 2 Name** makes sure that the line is created, and you can select the **Options Var1** (the different regular Colors and the Assortment Colors

	☒	ZZ	☒	☐	Red/White/Blue Assortment

After you have marked the applicable Values (Colors and Assortment Colors), click **Close**.

To use the regular Colors in your Assortment Colors, you need to select the regular Colors (01 – 99 if applicable) as well, so you are not able to choose only the Assortment Colors!

After you have selected the **Options Var1**, you need to select the **Options Var2** (the different regular Sizes and the Assortment Sizes).

Now we still need to determine the content of the Assortments itself.

In this page, you need to click **Related, Matrix Master, Create/Maintain Assortment**.

Variant 1	Variant Description	Line Quantity	AA	CC	GG	ZZ	XS	S	M	L	XL	XXL	3XL	4XL
01	White		[6]	[6]	[6]	[6]	-	-	-	-	-	-	-	-
20	Royal Blue		[6]	[6]	[6]	[6]	-	-	-	-	-	-	-	-
30	Yellow		[6]	[6]	[6]	[6]	-	-	-	-	-	-	-	-
70	Red		[6]	[6]	[6]	[6]	-	-	-	-	-	-	-	-
MC	Mixed Colors		[0]	[0]	[0]	[0]	-	-	-	-	-	-	-	-
XX	Yellow/Blue Assortment		[0]	[0]	[0]	[0]	-	-	-	-	-	-	-	-
YY	Red/White Assortment		[0]	[0]	[0]	[0]	-	-	-	-	-	-	-	-
ZZ	Red/White/Blue Assort...		[0]	[0]	[0]	[0]	-	-	-	-	-	-	-	-

In every Matrix Cell of an one Color/Assortment Size (AA/CC/GG), you need to enter an *M* or *m* to fill the actual content of the Assortment as we did before in [Setup Assortments in a Sizes VarDim Type](#). This is not necessary if you already had a **VarDim Type** of **Type Code** for the Assortments of the right **Assortment VarDim Type**, then the system will already determine the content for the 1 Color/Assortment Size combinations.

For the Assortment Size ZZ however we need to specify the content, especially in combination with the Assortment Colors MC, XX, YY, ZZ.

I.e., if you enter *M* in the Matrix Cell of ZZ/ZZ and click **<Enter>** you can fill the quantities for the Colors and Sizes in that Assortment.

Variant 1	Variant Description	Line Quantity	AA	CC	GG	ZZ	XS	S	M	L	XL	XXL	3XL	4XL
01	White	6	-	-	-	-	-	-	1	2	2	1	-	-
20	Royal Blue	6	-	-	-	-	-	-	1	2	2	1	-	-
30	Yellow		-	-	-	-	-	-	-	-	-	-	-	-
70	Red	6	-	-	-	-	-	-	1	2	2	1	-	-
MC	Mixed Colors		-	-	-	-	-	-	-	-	-	-	-	-
XX	Yellow/Blue Assortment		-	-	-	-	-	-	-	-	-	-	-	-
YY	Red/White Assortment		-	-	-	-	-	-	-	-	-	-	-	-
ZZ	Red/White/Blue Assortment		-	-	-	-	-	-	-	-	-	-	-	-

This must be done for every Color/Size combination that did not get automatically already the content.

As you can see; the content of these Multi Color/Multi Size Assortment is related to the Master; not to a specific VarDim Type.

Therefore, it means that you must determine the content of every Assortment combination in every Master where you want to use these Assortments.

Based on the selected Colors and Sizes via **Actions, Matrix, Matrix, Matrix** in the Master List/Card, the Items that might be created automatically – based on the parameter **Create All Matrix Related Items** in the

Inventory setup – will get automatically some specific content, the same way as in [Setup Assortments in a Separate VarDim Type](#):

Direct Unit Cost Calculation Method will by default be filled with *Items in Assortment*.

Unit Price Calculation Method will by default be filled with *Items in Assortment*.

In other words: The **Direct Unit Cost** and the **Unit Price** for the Assortment Items will simply be based on the sum of the Direct Unit Costs and Unit Prices of the underlying Items. Of course, this also influences the **Unit Cost** (based on the **Direct Unit Cost**) of the Assortment Items.

I.e., if 1 Item has a **Direct Unit Cost** of 30, and there are 18 pieces in an Assortment, the **Direct Unit Cost** for the Assortment becomes $30 \times 18 = 540$.

If this is not what you want, you need to change these two fields manually in the Item Card.

In that case, you can enter the **Last Direct Cost**, (Standard/Calculated) **Unit Cost** on the Assortment Items manually and make sure that you have entered the Sales Prices specifically for these Assortment Items by using the Search Expression or Formulas in the Master Sales Prices, or by entering the Sales Prices related to the individual Assortment Items as described before.

HOW TO MAKE USE OF THE MATRIX DISTRIBUTION

Also, for the Assortments of many Colors/many Sizes, you can use the **Matrix Distribution** for the quantities per Size as described in [How to make use of the Matrix Distribution](#).

HOW TO SEE THE CONTENT OF AN ASSORTMENT ITEM

The underlying Items of Assortment Items can also be seen in the Bill of Materials of the Assortment Items (via **Process, Bill of Materials**):

The screenshot shows the 'Items' list in the TRIMIT software. The 'Bill of Materials' button is highlighted in the top right. Below the list, a dialog box is open with the 'Item BOM' option selected.

No.	Item Type	Description	Description 2	Master No.	Type	Inventory	Subst... Exist	Management Level	Assem... BOM	Production BOM No.	Routing No.	Base Unit of Measure	Cost in Adj...	Unit Cost	Unit Price
2135ZZZZ	Finished Goods	Assortment T-Shirt	Red/White/Blue Assortment,M-XXL 1221 - 4 Colors	2135	Inventory	0	No	0	No			PCS		0.00	0.00

HOW TO USE THESE ASSORTMENTS

These Assortments can simply be used as a regular Color/Size in a Matrix.

In the Lines of the Sales Document, Purchase Document and Production Collecting Order you can choose **Type Matrix** to enter the quantities per Color/Assortment of a Master.

In the Lines of the Item Journal, Reclassification Journal and Physical Inventory Journal you can choose **Matrix Type Matrix**, to enter the quantities per Color/Assortment of a Master.

I.e., in the Matrix of a Sales Order:

Edit - Sales Order 0100001 - No. 2135 - Assortment T-Shirt -															
Item 2135ZZZZ is not available															
Search Edit List Matrix Inventory Profile More options															
Variant 1	Variant Description	Line Quantity	AA	CC	GG	ZZ	XS	S	M	L	XL	XXL	3XL	4XL

NOTE

You can only enter Quantities on the Matrix Cells of the single Color/single Size and for the combinations, for which you did fill the content of the assortments.

PRINTING SALES-/PURCHASE DOCUMENT

Specifically, regarding Assortments used in Sales-/Purchase Lines, it is important to set the Assortment-related fields in the **Report Layout Settings** for the following Reports:

6036700	trm Sales Quote
6036701	trm Sales Order
6036702	trm Sales Invoice
6036703	trm Sales Credit Memo
6036704	trm Sales Shipment
6036730	trm Purchase Order

EXPLODING ASSORTMENT

IN SALES-/PURCHASE-/TRANSFER ORDERS

In a Sales Order you can use **Explode BOM** (via **Line, Functions, Explode BOM**) on an Item Line that represents an Assortment (regardless which type of Assortment it might be).

Description	Description 2	Location Code	Quantity	Unit of Measure Code	Unit Price Excl. VAT
Rose Shirt		BLUE	9	PCS	32.00
Rose Shirt	White,S-XL 1221	BLUE	2	PCS	30.00
Rose Shirt	Yellow,S-XXL 12211	BLUE	3	PCS	36.00
Rose Shirt	Lawn Green,M-XXL 1221	BLUE	4	PCS	30.00
Assortment T-Shirts		BLUE	10	PCS	540.00
					540.00
					279.93
					279.93
Blouse	Pink,S-XXL / 12211	BLUE	3	PCS	279.93

NOTE

Kit = Business Central functionality comparable to the TRIMIT Assortment.
But we will always advise to use the TRIMIT Assortments.

I.e., This Assortment Item Line:

Type	No.	Description	Description 2	Location Code	Quantity	Unit of Measure Code	Unit Price Excl. VAT
Matrix	2130	Rose Shirt		BLUE	9	PCS	32.00
Item	213001AA	Rose Shirt	White,S-XL 1221	BLUE	2	PCS	30.00
Item	213030BB	Rose Shirt	Yellow,S-XXL 12211	BLUE	3	PCS	36.00
Item	213065CC	Rose Shirt	Lawn Green,M-XXL 1221	BLUE	4	PCS	30.00
Matrix	2135	Assortment T-Shirts		BLUE	10	PCS	540.00
Item	2135ZZZZ	Assortment T-Shirts	Red-White-Blue Assortment,M-XXL 1221 - mixed C...	BLUE	10	PCS	540.00
Assortment Matrix	2110	Mia Blouse		BLUE	8	PCS	279.93
Item	211070GG	Mia Blouse	Red,XS-XL / 12211	BLUE	5	PCS	279.93
Item	211073HH	Mia Blouse	Pink,S-XXL / 12211	BLUE	3	PCS	279.93

Will then explode after confirming following message:

Explode the BOM?

Yes No

Into:

After the **Explode BOM** function, you lose the fact that the customer bought an Assortment, but only see the underlying Items (and simply as Item Lines – not as part of a Matrix!!), and the **Unit Price Excl. VAT** will be determined again based on the Sales Prices of the individual Items!

Therefore, if you have a special Assortment Price which is not the sum of the individual Sales Prices of the Items it contents, you need to change the **Unit Price Excl. VAT** on the new created Item Lines manually. The **Quantity** of the original (Assortment) Matrix will also be corrected.

The new Item Lines will always be added at the end of all the Sales Lines.

This function is also available in other Sales-/Purchase Documents and Transfer Orders via **Line, Functions, Explode BOM** or **Functions, Explode BOM**

IN ITEM-/PHYSICAL INVENTORY JOURNAL

EXPLODE AN ASSORTMENT

In case you want to explode (unpack) an Assortment-Item into its regular Items, you can use the **Item Journal**.

Step 1: enter a **Negative Adjustment** for the Assortment-Item

Item Journals

Batch Name DEFAULT

Manage Process Post/Print Line Item  Open in Excel | Actions Related Fewer options

Matrix Type	Posting Date	Exp... Mat...	Entry Type	Document No.	Item No.	Description	Description 2	Location Code	Quantity	Unit of Measure Code	Unit Am
Item	3/22/2021	☐	Negative Adjmt.	T00001	211030AA	Mia Blouse	Yellow,XS-L / 1221	BLUE	2	PCS	

Step 2: click **Actions, Functions, Explode/Collapse Assortment**

The screenshot shows the 'Item Journals' window. The 'Batch Name' is set to 'DEFAULT'. The 'Actions' tab is selected. The 'Functions' dropdown menu is open, and 'Explode/Collapse Assortment' is highlighted. Other options in the menu include 'Explode BOM', 'Calculate Warehouse Adjustment...', 'Get Standard Journals...', and 'Save as Standard Journal...'.

This function will automatically create the “regular” Item Lines with a **Positive Adjustment**, based on the content of the Assortment.

You will get a message to determine where to take the Dimensions from:

- Copy Dimension from BOM = Copy Dimensions from Assortment-Item
- Retrieve Dimensions from Components = Take Dimensions from “regular” Items:

The dialog box has two radio buttons. The first is selected: ☒ Copy dimensions from BOM. The second is: ☐ Retrieve dimensions from components. There are 'OK' and 'Cancel' buttons at the bottom.

The screenshot shows the 'Item Journals' window after the 'Explode/Collapse Assortment' function has been executed. The table below shows the resulting Item Lines.

Matrix Type	Posting Date	Exp... Mat...	Entry Type	Document No.	Item No.	Description	Description 2	Location Code	Quantity	Unit of Measure Code	Unit A
