INTRODUCTION

This White Paper describes the new functionality of the **TRIMIT PDM Report Set**.

This functionality enables users to setup the fields they want to see in the header of the PDM Reports.

It also enables users to setup a report set containing several PDM Reports that should be exported to one single pdf-file or printed at once.

It is still possible to print the individual PDM Reports as in previous releases of TRIMIT. But if you use the report called **Master Reports** it can only be handled by using the **PDM Report Set**.

The functionality described is the functionality in **TRIMIT 21.1 for Business Central W1 BC18.X**.

The pictures in this White Paper are based on the demo database for **TRIMIT 21.1**, which is based on Microsoft Dynamics 365 Business Central 2021 Release Wave 1, in the demo company **CRONUS TRIMIT W1 Ltd.** (based on CRONUS International Ltd. of Microsoft Dynamics 365 Business Central).

COMPONENTS

TRIMIT PDM Report Set contains the following objects:

The tables	6037230	<i>trm PDM Report Set</i>
	6037231	<i>trm PDM Report Set Line</i>
	6037232	<i>trm PDM Report Set Captions</i>
	6027707	<i>trm E-Mail Log Entry Files</i>
The pages	6037230	<i>trm PDM Report Sets</i>
	6037231	<i>trm PDM Report Set Lines</i>
	6037232	<i>trm PDM Report Set Captions</i>
	6037233	<i>trm PDM Report Set</i>
	6037234	<i>trm PDM Report Set Line</i>
	6037235	<i>trm PDM Files</i>
The reports	6037200	<i>trm PDM Master Card</i>
	6037203	<i>trm PDM Product Line View</i>
	6037204	<i>trm PDM Bill of Materials</i>
	6037205	<i>trm PDM Additional Info</i>
	6037206	<i>trm PDM Measurement Chart</i>
	6037207	<i>trm PDM Additional Comments</i>
	6037208	<i>trm PDM Report Set</i>
	6037209	<i>trm PDM Comp. and Care Label</i>
The codeunits	6037230	<i>trm PDM Report Functions</i>
	6037231	<i>trm PDM Curr Report Set Func</i>

PICTURES CAN BE HANDLED IN TWO DIFFERENT WAYS:

- By using the dll's according the Installation Guide.

This can only be used in an on-prem installation.

- o pdfium.dll
- o pdfium-x86.dll
- o Cpo.NAV.AddIn.dll

- By using a TRIMIT API service, specifically for handling the pictures.

This can be used for an on-prem installation and for a cloud installation.

You need to add the **API Service URL** in the Basic Setup: <http://appservices.trimit.com>

The necessary **API Service Token** will then be filled automatically – behind the scene.

PDM REPORT SET

You can setup several **PDM Report Sets** to combine different PDM Reports that needs to be printed or exported to one pdf-file at once.

It is also possible to determine which fields should be printed in the header of the reports:

DESCRIPTION OF THE FIELDS:

CODE

The **Code** for this specific PDM Report Set.

This is the unique key for the Table **6037230 trm PDM Report Set**.

DESCRIPTION

You can enter a **Description** for this PDM Report Set

DEFAULT

You can setup the fields you want to see in the header of the PDM Reports. This can be done for every PDM Report Set individually, and even per Report.

A checkmark in the field **Default** sets the defaults for these fields.

That means that if a PDM Report Set might not have the fields set for the header of the Reports, the settings of this specific PDM Report Set will be used.

You can only have 1 (one) PDM Report Set with a checkmark in **Default**.

PRINT LANGUAGE

You can enter the **Language** for printing the names of the fields in the header of the PDM Reports. This will however depend on the settings in the specific PDM Report Set regarding the fields you want to print, and the captions you have entered for these fields.

Per **PDM Report Set** you can setup maximum 10 fields you want to see in the header of the PDM Reports.

FASTTAB HEADER INFO

For every **PDM Report Set**, you can setup the fields and content of the fields that needs to be printed in the header of the PDM Reports.

Header Info			
Header	Report Name	Caption Line 5	1
Header Text	MASTER REPORT	Line 6	Item Statistics Group 2
Line 1	Master No.	Show 6	Code and Description
Show 1	Code	Caption Line 6	1

Show 2	Description	Caption Line 7	1
Caption Line 2		Line 8	Size Range
Line 3	Status Code	Show 8	Description
Show 3	Code and Description	Caption Line 8	1
Caption Line 3		Line 9	Vendor
Line 4	Global Dimension 1	Show 9	Code and Description
Show 4	Code and Description	Caption Line 9	1
Caption Line 4		Line 10	Print Date
Line 5	Global Dimension 2	Show 10	Description
Show 5	Code and Description	Caption Line 10	1

DESCRIPTION OF THE FIELDS:

HEADER

You can choose the **Header** for the report.

You can choose between the following five options:

Default	Depends on the PDM Report Set that is set as the Default
Report Name	The name of the actual Report
Master No. and Description	The Code of the Master and the Description
Master Description	Only the Master Description
Text	You can enter a Text yourself in the next field

HEADER TEXT

Here you can enter a **Header Text** that will be printed as the title of the report if you choose the last option for **Header: Text**.

NOTE

If **Header** is not filled with **Text**, the **Header Text** will not be printed.

LINE 1 – LINE 10

Here you can determine from which field the content should be printed on the corresponding line in the header of the PDM Report.

You can choose between the following twenty-two options:

Default	Depends on the content of this field in the PDM Report Set that is set as the Default
	The line in the header will remain empty
Master No.	1
Master Description	2
Master Description 2	3
Group Master	4
Status Code	5
Collection	6
Global Dimension 1	7
Global Dimension 2	8
Statistics Group	9
Item Statistics Group 2	10
Item Statistics Group 3	11
Item Statistics Group 4	12
Item Statistics Group 5	13
Item Category	14
MRP Responsible	15
Vendor	16
Report Name	Name of the PDM Report
Print Date	Date on which the report was printed
Size Range	From the last Variant in the VarDim Master, the first and the last possible Value will be determined and printed. I.e., SIZE_1 has the sizes XS, S, M, L, XL and XXL, therefore XS-XXL will be printed

SHOW 1 – SHOW 10

From the field you selected in **Line 1 – Line 10** you can determine what content should be printed.

You can choose between the following three options:

Description	Only the Description/Name of the content from the selected field.
Code and Description	The Code and the Description/Name of the content from the selected field.
Code	Only the Code of the content from the selected field.

I.e.:

If you choose **Item Statistics Group 2** and you choose **Description** you will see: *Coats*

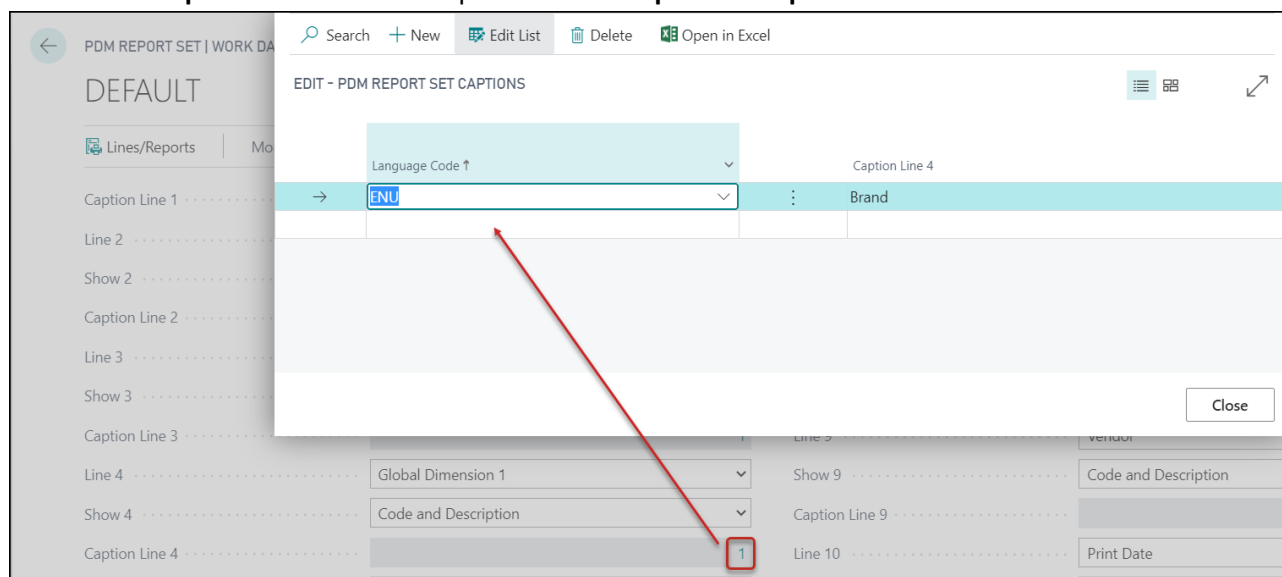

If you choose **Item Statistics Group 2** and you choose **Code and Description** you will see: *150 Coats*

If you choose **Item Statistics Group 2** and you choose **Code**, you will see: *150*

CAPTION LINE 1 – CAPTION LINE 10

You can determine per **Language Code** what the **Caption** should be that should be printed.

Click on the **Caption Line XX** field to open the **PDM Report Set Captions**:

NOTE

You don't have to fill these Line/Show/Caption fields for every PDM Report Set.

You can fill them for one PDM Report Set that has a checkmark in the field **Default** and in the other PDM Report Sets, you can leave all the **Line 1 – 10** set to *Default* and all the **Show 1 – 10** fields set to *Description*.

In that case, the settings of the default PDM Report Set will be taken.

Keep in mind however, that if you might change the content of the fields **Line 1 – 10** you need to change these Captions again.

If you leave the Captions blank, the system will take the normal names of the fields, and for the fields for which you can enter the Captions via the **Caption Class Setup** it will take these Captions.

PDM REPORT SET LINES

Per **PDM Report Set** you can select which reports needs to be printed by clicking **Line/Reports** in the ribbon **Home**.

PDM Report Sets: All Search + New Manage Lines/Reports Open in Excel Navigate Fewer options

Close			

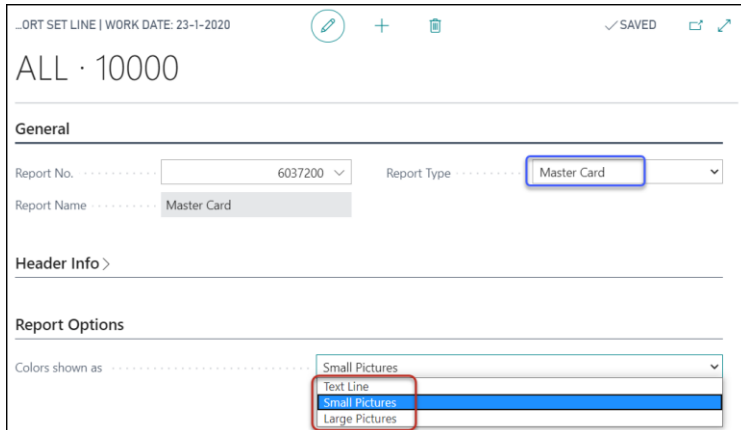

You can select a **Report No.** via **Look up value**.

The **Report Name** will be displayed.

For these PDM Reports, you can setup the details regarding the options you want to use, when this specific PDM Report is printed.

Therefore, you need to click **Edit**.

OPTIONS FOR REPORT TYPE MASTER CARD

Report 6037200 *trm Master Card* should have **Report Type Master Card**.

The fields on the FastTab **Header Info** are the same as in [FastTab Header Info](#) of the PDM Report Set but can be specified for this specific report.

COLORS SHOWN AS

You can choose the following three options:

Text Line	Only the Code and Description of the colors (first Variant in the VarDim Master) will be shown
Small Pictures	If a picture is related, small pictures will be printed of the colors (first Variant in the VarDim Master)
Large Pictures	If a picture is related, large pictures will be printed of the colors (first Variant in the VarDim Master)

NOTE

This is also the option you have if you would print the **Master Card** via **Tell me Master Card** or if you click **Report / Master** in the Master Card itself or if you click **Report / Master / Master** in the Master List.

I.e., with *Small Pictures*

I.e., with *Large Pictures (second page of the report)*

CARE LABEL LANGUAGE FILTER

In this field, you can select one or more Language Codes for the Descriptions of the different Care Labels.

NOTE

These are also the options you have if you would print the **Composition and Care Label** via **Tell me Composition & Care Label** if you click **Report / Composition & Care Label** in the Master Card itself or if you click **Report / Master / Composition & Care Label** in the Master List.

General

Report No. 6037203
Report Type Product Line

Report Name Product Line

Header Info >

Report 6037203 *trm Product Line* should have **Report Type Product Line**

This report will show the related Masters to a specific **Group Master**

See the **White Paper – TRIMIT Group Master** for the details.

This **Report Type** does not have any specific **Report Options**.

The report itself looks like as follows, where *M2010* is the Group Master, and the *2101*, *2102* and *2103* are related to this Group Master *M2010*.

Product Line	
Master No.	M2010
Description	Fabric 70 % Polyamide, 30 % Elastane
Status	
Brand	
Season	
Item Group	910 Fabrics
Gender	
Sizes	White - Black
Vendor	2000 Sewing & Stitching Ltd.
Date Printed	02-06-20

No. 2101
Description Julia Girl Blouse
Description 2
Size XS, S, M, L
Color 01 White, 20 Royal Blue, 35 Orange, 70 Red, 73 Pink

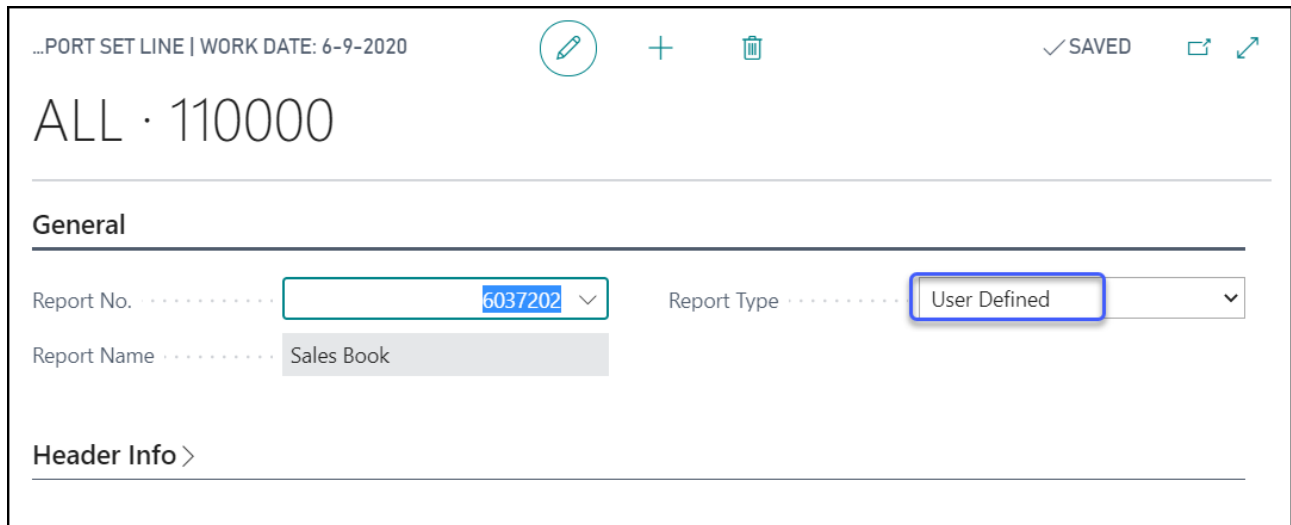

No. 2102
Description Romeo Boy Shirt
Description 2
Size XS, S, M, L
Color 21 Light Blue, 25 Navy, 99 Black

No. 2103
Description Caren Women Blouse
Description 2
Size XS, S, M, L, XL, XXL
Color 23 Ocean Blue, 30 Yellow, 35 Orange, 70 Red

NO OPTIONS FOR REPORT TYPE USER DEFINED

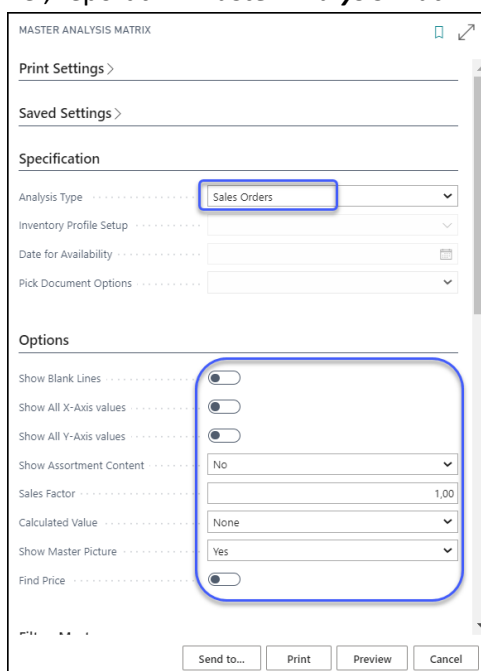

The fields on the FastTab **Header Info** are the same as in [FastTab Header Info](#) of the PDM Report Set but can be specified for this specific report.

This **Report Type** does not have any specific **Report Options** by default.
It can be used for customized reports, where you could create specific **Report Options** via a customized extension.

This **Report Type** also gives you the possibility to add other Reports to a specific PDM Report Set.
I.e., report **trm Check List (6037193)** or **trm PDM Sales Book (6037202)**
Keep in mind however that the PDM Check List and the PDM Sales Book will be printed per Master!

And if no specific fields have been implemented, the report will print according the defaults for the report.
I.e., report **trm Master Analysis Matrix (6036862)** has the defaults:

Therefore, if you would add this report to a **PDM Report Set**, and you would print this set specifically for Master 2100 the output to printer or pdf-file would look like:

Master Analysis Matrix

CRONUS TRIMIT W1 Ltd.

The possibilities are almost endless, although the help of a developer might be needed to develop the specific options you want to set for a report.

Keep in mind that only fields of the **Master** can be used as filters to print the reports.

PRINTING THE MASTER REPORTS

After you have setup the **PDM Report Sets**, you can print the **Master Reports** via **Tell me Master Reports** or by clicking **Master Reports** in the ribbon *Report* of the Master List and the Master Card.

DESCRIPTION OF THE OPTIONS:

PDM REPORT SET

You need to enter/select a **PDM Report Set**

INCLUDED REPORTS

A **PDM Report Set** has a list of Reports that needs to be printed.

Via the *AssistEdit* you can change the number of Reports of the **PDM Report Set** you want to *Preview*, send by *E-Mail* or for which you want a *File List* for this run of the PDM Report Set.

OUTPUT TO

You can choose between the following two options:

Preview	After clicking OK, one pdf-file will be created with all the reports of the PDM Report Set. The name of this pdf-file is "Master_" + Master No. and you can find it in the left-down corner of your screen. PRODUCTION ORDERS PROD. PROD. ORDERS PROD. OF Master_2100.pdf By clicking on the name, you can open it and determine what you want to do with this pdf-file like saving, printing, sending, etc. You can only choose 1 single Master by using the Filters. Otherwise, you will get a message: ! Only E-Mail can be used, when the filter includes more than one master. Use File List instead OK
E-Mail	After clicking OK, one pdf-file per Master will be created with all the reports of the PDM Report Set. Based on an E-Mail Template for the report 6037208 trm PDM Report Set a preview will be shown of this created E-Mail. Keep in mind, that every Master you select needs to have a Vendor No. in the Card. Also keep in mind that if you select several Masters, all the pdf-files will be added to an E-mail that will be send to the first Vendor!! Therefore, always filter on a Vendor No. if you want to send several Masters at the same time. I.e.:

File List	If you select several Masters, for every Master a pdf-file will be created and will be shown in a list of PDM Files. Then you can click on every individual pdf-file or click Show File to download the pdf-file. PDM Files Work Date: 6-9-2020 ✓ Saved Search Manage Show File Open in Excel More options <table style="width: 100%; border-collapse: collapse; font-size: 0.8em;"> <thead> <tr> <th style="width: 10%;"></th> <th style="width: 90%;">File Name</th> </tr> </thead> <tbody> <tr> <td></td> <td>Master_2000.pdf</td> </tr> <tr> <td></td> <td>Master_2010.pdf</td> </tr> <tr> <td></td> <td>Master_2020.pdf</td> </tr> <tr> <td style="text-align: center;">→</td> <td>Master_2030.pdf</td> </tr> </tbody> </table>		File Name		Master_2000.pdf		Master_2010.pdf		Master_2020.pdf	→	Master_2030.pdf																		
	File Name																												
	Master_2000.pdf																												
	Master_2010.pdf																												
	Master_2020.pdf																												
→	Master_2030.pdf																												

The created pdf-file can uphold all the selected reports. I.e.:

The image displays a grid of six TRIMIT report templates, each featuring a red shirt image and various data fields. The reports are:

- Master Card:** Includes fields for Name, Description, Part Name, and various attributes like Color, Size, and Material.
- Bill of Materials:** Includes a table for Material, Quantity, and Unit, along with a list of components.
- Additional Comments:** Includes a section for Comments and a list of items.
- Additional Info:** Includes a section for Additional Information and a list of items.
- Measurement Chart:** Includes a table for Measurement, Unit, and a list of items.
- Composition & Care Label:** Includes a section for Composition and Care Instructions, along with a list of items.

NOTE

To be able to have several reports in one pdf-file, you need to have the newest dll's installed or the API Service URL filled in the Basic Setup. This will handle the combination of several reports in one pdf-file.

COLLECTION FILTER

When entering a **Collection Filter**, only for the Masters that are connected to this Collection will be attached as pdf-files in an E-Mail.

NOTE

It doesn't make sense to use the **Collection Filter** for an **Output To Preview**, because that will only be for 1 single Master.

WHAT IS PRINTED/EXPORTED EXACTLY

As you have seen in the previous chapters you can setup:

1. Fields that default need to be printed in the header of all the PDM Report Lines (individual PDM Reports) of all the PDM Report Sets (if **Default** is Yes of a PDM Report Set)
2. Fields that need to be printed in the header of all the PDM Report Lines (individual PDM Reports) on a specific PDM Report Set
3. Fields that need to be printed in the header of a specific PDM Report Line (individual PDM Report) of a PDM Report Set

Setup of 3. is the highest priority. However, if the field is set to *Default* the settings of 1. will be taken. If there is no setup for 3. the setup of 2. will be taken, but if the field is set to *Default* the settings of 1. will be taken.

The specific **Header Fields** are only applicable for the following Reports based on the **Report Type**:

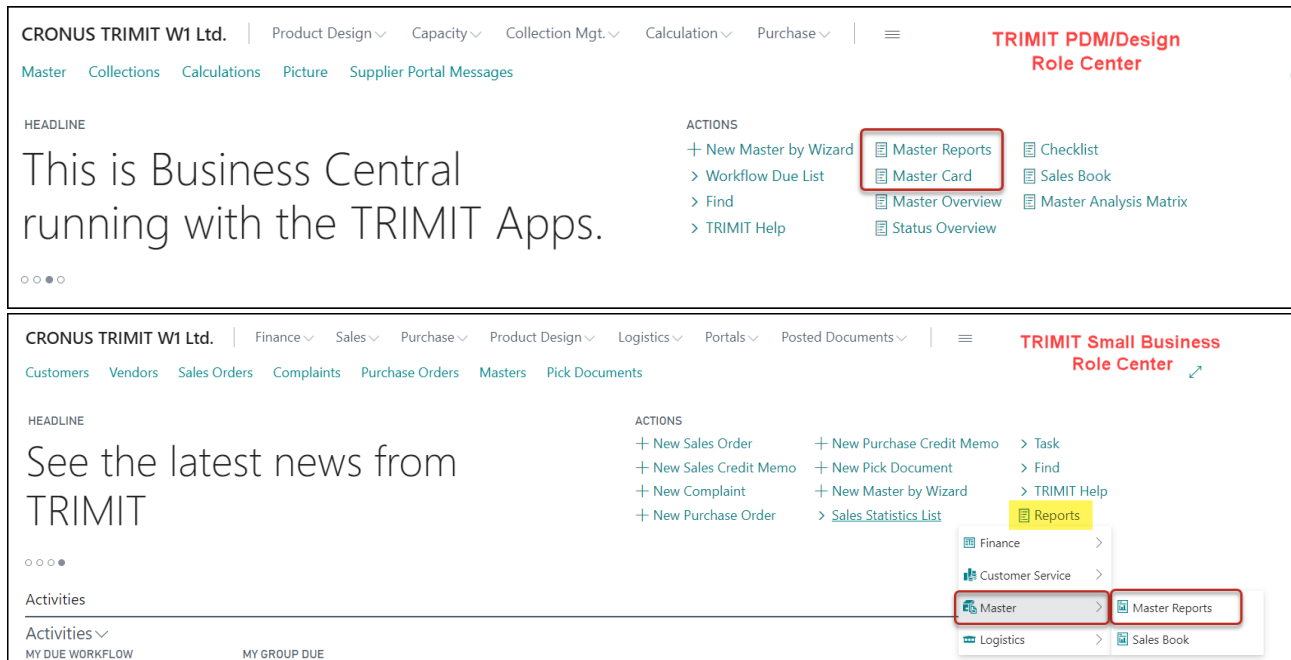

6037200	trm Master Card
6037203	trm Product Line View
6037204	trm Bill of Materials
6037205	trm Additional Info
6037206	trm Measurement Chart
6037207	trm Additional Comments
6037209	trm Composition and Care Label

You can make as many PDM Report Sets as you like, with all kinds of combinations of Reports.

PRINTING INDIVIDUAL PDM REPORTS

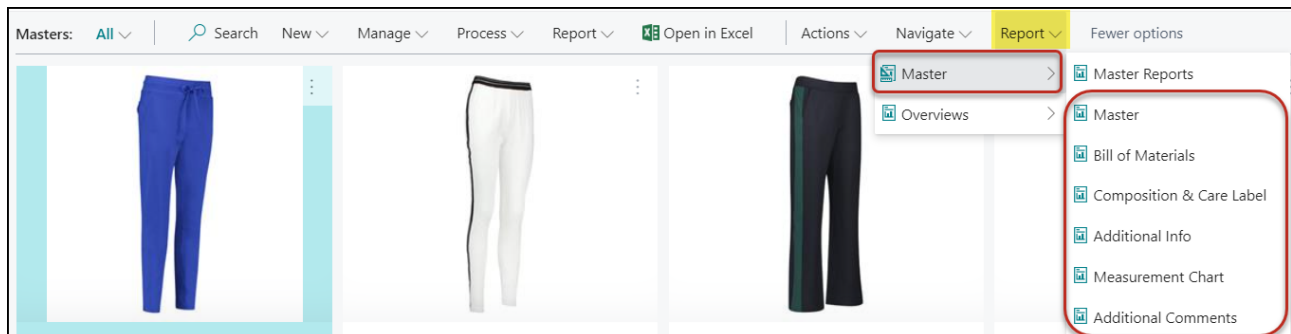

Besides using the **PDM Report Set** to print several PDM Reports at once, you are still able to print one of the PDM Reports individually.

This can be done via **Tell me**, or based on the Role Center

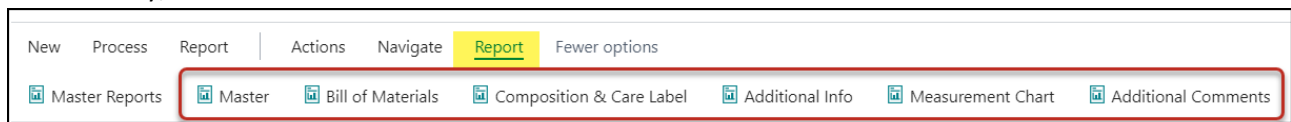

The top screenshot shows the 'TRIMIT PDM/Design Role Center' interface. The 'ACTIONS' menu is open, and 'Master Reports' and 'Master Card' are highlighted. The bottom screenshot shows the 'TRIMIT Small Business Role Center' interface. The 'Master' dropdown menu is open, and 'Master Reports' is highlighted.

Alternatively, via the Master List:

The screenshot shows the 'Masters' list interface. The 'Report' dropdown menu is open, and 'Master Reports' is highlighted. The list displays three items: a blue pair of pants, a white pair of pants, and a black pair of pants.

Alternatively, via the Master Card:

The screenshot shows the 'Master Card' interface. The 'Report' dropdown menu is open, and 'Master Reports' is highlighted. The card displays various options: Master Reports, Master, Bill of Materials, Composition & Care Label, Additional Info, Measurement Chart, and Additional Comments.

If no **PDM Report Set** has been created to determine the fields that should be printed in the header of the PDM Reports, the system will automatically use the following setup for the fields and will always print it in your own Windows Language.

1. Master No.
2. Master Description
3. Size Range
4. Statistics Group
5. Item Statistics Group 2
6. Item Statistics Group 3
7. Global Dimension 1
8. Global Dimension 2
9. Collection
10. Vendor

The header lines of the PDM Reports will then look like:

		Master Card		
No.		2100		
Description		Lily Blouse		
Size Range		XS - 3XL		
Design		One Color		
Item Group		Blouses/Shirts		
Gender		Women		
Brand Code		Fashion		
Season Code		Summer Current Year		
Supplier				

As you can see, besides the **No.** only Descriptions/Names are printed.

The captions for **Statistics Group** (Design), **Item Statistics Group 2** (Item Group) and **Item Statistics Group 3** (Gender) depend on the **Caption Class Setup** setting.

The captions for the **Global Dimension 1** (Brand Code) and **Global Dimension 2** (Season Code) depend on the Names/Translations of the Dimensions

The line 9. with the **Collection**, will only be filled, if you also filtered on the Collection when you printed the PDM Report.
