Introduction

This White Paper describes the functionality of the **TRIMIT PDM Report Set**.

This functionality enables users to setup the fields they want to see in the header of our PDM Reports. It also enables users to setup a Report Set containing several PDM Reports that should be exported to one single pdf-file or printed at once.

It is still possible to print the individual PDM Reports.

But if you use the report called **Master Reports** it can only be handled by using the **PDM Report Set**.

It is also possible to send the pdf-file of the PDM Reports to the Vendor of a Master by using the **TRIMIT E-Mail Templates**. For more details see **White Paper – TRIMIT E-Mail**.

The audience for this document is the Consultant or very skilled User. It will only describe the TRIMIT fields/functionality and not the standard Business Central fields/functionality. Be aware of not changing settings and parameters in a live database without consulting the implementing partner.

The functionality described is the functionality as of **TRIMIT 24.2 for Business Central W1 BC25.X**.

The pictures in this White Paper are based on the demo data for **TRIMIT 24.2**, which is based on Microsoft Dynamics 365 Business Central 2024 Release Wave 2, in the demo company **CRONUS TRIMIT W1 Ltd.** (based on CRONUS International Ltd. of Microsoft Dynamics 365 Business Central).

Components

TRIMIT PDM Report Set 24.2 contains the following objects:

The tables

6037230	<i>trm PDM Report Set</i>
6037231	<i>trm PDM Report Set Line</i>
6037232	<i>trm PDM Report Set Captions</i>

PDM Report Set

You can setup several **PDM Report Sets** to combine different PDM Reports that needs to be printed or exported to one pdf-file at once.

It is also possible to determine which fields should be printed in the header of the reports:

	Master Card		
	Master No.	2100	
	Description	Lily Blouse	
	Status		
	Brand	FASHION Fashion	
	Season	02-SUMMER Summer Current Year	
	Item Group	110 Blouses/Shirts	
	Gender	110 women	
	Sizes	XS - 3XL	
	Vendor		
Date Printed		07/18/23	

Click **Search** and search for **PDM Report**. Click on **PDM Report Sets**.

When standing on **DEFAULT**, click **Edit** to see the Card.

PDM Report Sets					✓ Saved			
							More options	
Code ↑		Description	Default	Print Language				
ALL		All Reports	☐	ENU				
→ DEFAULT		Default Master Card	☒	ENU				
SHOES		Master+Measurements+Comments	☐	ENU				

FastTab General

The screenshot shows the 'FastTab General' settings for a 'PDM Report Set' named 'DEFAULT'. The interface includes a top bar with icons for edit, share, add, and delete, along with a 'Saved' status. Below the title, there are tabs for 'Lines/Reports' and 'More options'. The 'General' tab is active, showing fields for 'Code' (DEFAULT), 'Description' (Default Master Card), 'Default' (checked), and 'Print Language' (ENU).

Description of the Fields:

Code

The **Code** for this specific PDM Report Set.
This is the unique key for the Table **6037230 trm PDM Report Set**.

Description

You can enter a **Description** for this PDM Report Set

Default

You can setup the fields you want to see in the Header of the PDM Reports. This can be done for every PDM Report Set individually, and even per Report in the Report Set.
A checkmark in the field **Default** sets the defaults for these fields.
That means that if a PDM Report Set might not have the fields filled for the Header of the Reports, the settings of this specific PDM Report Set will be used.
You can only have 2 (one) PDM Report Set with a checkmark in **Default**.

Print Language

You can enter the **Language** for printing the names of the fields in the header of the PDM Reports. This will however depend on the settings in the specific PDM Report Set regarding the fields you want to print, and the Language related captions you have entered for these fields.

Per **PDM Report Set** you can setup maximum 10 fields you want to see in the header of the PDM Reports.

FastTab Header Info

For every **PDM Report Set**, you can setup the fields and content of the fields that needs to be printed in the header of the PDM Reports.

Header Info

Header	Report Name	Caption Line 5	1
Header Text	MASTER REPORT	Line 6	Item Statistics Group 2
Line 1	Master No.	Show 6	Code and Description
Show 1	Code	Caption Line 6	1
Caption Line 1	1	Line 7	Item Statistics Group 3
Line 2	Master Description	Show 7	Code and Description
Show 2	Description	Caption Line 7	1
Caption Line 2	1	Line 8	Size Range
Line 3	Status Code	Show 8	Description
Show 3	Code and Description	Caption Line 8	1
Caption Line 3	1	Line 9	Vendor
Line 4	Global Dimension 1	Show 9	Code and Description
Show 4	Code and Description	Caption Line 9	1
Caption Line 4	1	Line 10	Print Date
Line 5	Global Dimension 2	Show 10	Description
Show 5	Code and Description	Caption Line 10	1

Description of the Fields:

Header

You can choose the **Header** for the report.

You can choose between the following five options:

Default	Depends on the PDM Report Set that is set as the Default
Report Name	The name of the actual Report
Master No. and Description	The Code of the Master and the Description
Master Description	Only the Master Description
Text	You can enter a Text yourself in the next field Header Text

Header Text

Here you can enter a **Header Text** that will be printed as the title of the Report if you choose the last option for **Header**: *Text*.

Note

If **Header** is not filled with *Text*, the **Header Text** will not be printed.

Line 1 – Line 10

Here you can determine from which field of the Master; the content should be printed on the corresponding Line in the Header of the PDM Report.

You can choose between the following twenty-two options:

Default	Depends on the content of this field in the PDM Report Set that is set as the Default
	The line in the header will remain empty
Master No.	1
Master Description	2
Master Description 2	3
Group Master	4
Status Code	5
Collection	6
Global Dimension 1	7
Global Dimension 2	8
Statistics Group	9
Item Statistics Group 2	10
Item Statistics Group 3	11
Item Statistics Group 4	12
Item Statistics Group 5	13
Item Category	14
MRP Responsible	15
Vendor	16
Report Name	Name of the PDM Report
Print Date	Date on which the report was printed
Size Range	From the last Variant in the VarDim Master of a Matrix Master, the first and the last possible Value will be determined and printed. I.e., SIZE_C has the sizes XS, S, M, L, XL and XXL, therefore XS-XXL will be printed

Information Item

Show 1 – Show 10

From the field you selected in **Line 1 – Line 10** you can determine what content should be printed.
You can choose between the following three options:

Description	Only the Description/Name of the content from the selected field.
Code and Description	The Code and the Description/Name of the content from the selected field.
Code	Only the Code of the content from the selected field.

I.e.:

If you choose **Item Statistics Group 2** and you choose **Description** you will see: *Coats*

If you choose **Item Statistics Group 2** and you choose **Code and Description** you will see: *150 Coats*

If you choose **Item Statistics Group 2** and you choose **Code**, you will see: *150*

Caption Line 1 – Caption Line 10

You can determine per **Language Code** what the **Caption** should be that should be printed.
Click on the **Caption Line XX** field to open the **PDM Report Set Captions**:

The screenshot shows the 'PDM Report Set' configuration interface. The main window is titled 'DEFAULT' and contains a grid of fields for 'Header Info', 'Line 1' through 'Line 10', and 'Caption Line 1' through 'Caption Line 10'. A red box highlights the 'Caption Line 5' field, which contains the value '5'. A red arrow points from this box to a secondary window titled 'Edit - PDM Report Set Captions'. This secondary window shows a table with 'Language Code' and 'Caption Line 4' columns. The table contains entries for ENU, DEU, NLD, DAN, and NOR, with corresponding captions like 'Brand', 'Marke', 'Merk', 'Mærke', and 'Merke'.

Note

You do not have to fill these Line/Show/Caption Line fields for every PDM Report Set.
You can fill them for one PDM Report Set that has a checkmark in the field **Default** and in the other PDM Report Sets, you can leave all the **Line 1 – 10** set to *Default* and all the **Show 1 – 10** fields set to *Description*.
In that case, the settings of the default PDM Report Set will be taken.

Keep in mind however, that if you might change the content of the fields **Line 1 – 10** you also need to change the Caption Lines again.

If you leave the Caption Lines blank, the system will take the regular names of the fields, and for the fields for which you can enter the Captions via the **Caption Class Setup** it will take these Captions.

Per **PDM Report Set** you can select which Reports should be printed by clicking **Lines/Reports**.

General

Report No. 6037202 Report Type User Defined

Report Name Sales Book

Header Info >

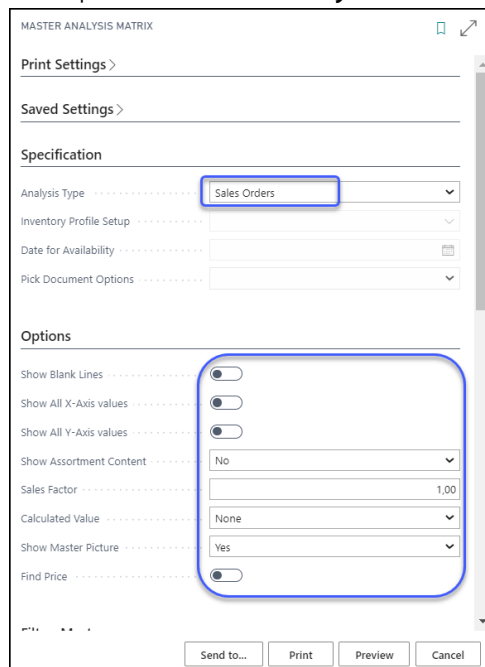

The fields on the FastTab **Header Info** are the same as in [FastTab Header Info](#) of the PDM Report Set but can be specified for this specific report.

This **Report Type** does not have any specific **Report Options** by default.
It can be used for customized reports, where you could create specific **Report Options** via a customized extension.

This **Report Type** also gives you the possibility to add other Reports to a specific PDM Report Set.
I.e., report **trm Check List (6037193)** or **trm PDM Sales Book (6037202)**
Keep in mind however that the PDM Check List and the PDM Sales Book will be printed per Master!

And if no specific fields have been implemented, the report will print according to the defaults for the report.

I.e., report **trm Master Analysis Matrix (6036862)** has the defaults:

MASTER ANALYSIS MATRIX

Print Settings >

Saved Settings >

6037207	Additional Comments	☒
6037209	Composition & Care Label	☒
→ 6037211	Sustainability	☒

Description of the Options:

PDM Report Set

You need to enter/select a **PDM Report Set**

Included Reports

A **PDM Report Set** has a list of Reports that needs to be printed.

Via the *AssistEdit* you can change the number of Reports of the **PDM Report Set** you want to *Preview*, send by *E-Mail* or for which you want a *File List* for this run of the PDM Report Set.

The first number shown in the option **Included Reports** will change accordingly.
The second number is the number of Reports in the **PDM Report Set**.

Output To

You can choose between the following two options:

Preview	After clicking OK, one pdf-file will be created with all the reports of the PDM Report Set. The name of this pdf-file is "Master_" + Master No. and you can find it in your Downloads directory. By clicking on the name, you can open it and determine what you want to do with this pdf-file like saving, printing, sending, etc. You can only choose 1 single Master by using the Filters. Otherwise, you will get a message: ! Only E-Mail can be used, when the filter includes more than one master. Use File List instead OK
E-Mail	After clicking OK, one pdf-file per Master will be created with all the reports of the PDM Report Set. Based on an E-Mail Template for the report 6037208 trm PDM Report Set a preview will be shown of this created E-Mail.

Keep in mind, that every Master you select needs to have a **Vendor No.** in the Card. Also keep in mind that if you select several Masters, all the pdf-files will be added to an E-mail that will be send to the first Vendor!! Therefore, always filter on a **Vendor No.** if you want to send several Masters at the same time. And it could – based on the E-Mail Template – have the Master Number in the **Subject**. If you send several Master Reports, it will only give you the Code of the first Master. I.e., if you send all Master Reports to **Vendor No. 2300**:

Email Information

Template No. PDM_REPORT_SET Main Report ID 6037208

You can change details of this E-Mail or even attach other files as well. After clicking **Send email**, the E-Mail will be sent. The created E-Mail can also be logged in the **Send emails**.

File List If you select several Masters, for every Master a pdf-file will be created and will be shown in a list of **PDM Files**. Then you can click on every individual pdf-file or click **Shoe File** to download the pdf-file.

PDM Files

✓ Saved

 Search

Manage

 Show File

File Name

	Master_2100_Lily Blouse.pdf	
	Master_2110_Mia Blouse.pdf	
	Master_2120_Sophia Shirt.pdf	⋮
→	Master_2130_Rose Shirt.pdf	⋮

The created pdf-file can uphold all the selected reports. I.e.:

Note

To be able to have several reports in one pdf-file, you need to have the newest dll's installed or the API Service URL filled in the Basic Setup. This will handle the combination of several reports in one pdf-file.

Collection Filter

When entering a **Collection Filter**, only for the Masters that are connected to this Collection will be attached as pdf-files in an E-Mail.

Note

It does not make sense to use the **Collection Filter** for an **Output To Preview**, because that will only be for 1 single Master.

What is Printed/Exported exactly

As you have seen in the previous chapters you can setup:

1. Fields that default need to be printed in the header of all the PDM Report Lines (individual PDM Reports) of all the PDM Report Sets (if **Default** is Yes of a PDM Report Set)
2. Fields that need to be printed in the header of all the PDM Report Lines (individual PDM Reports) on a specific PDM Report Set
3. Fields that need to be printed in the header of a specific PDM Report Line (individual PDM Report) of a PDM Report Set

Setup of 3. is the highest priority. However, if the field is set to *Default* the settings of 1. will be taken. If there is no setup for 3. the setup of 2. will be taken, but if the field is set to *Default* the settings of 1. will be taken.

The specific **Header Fields** are only applicable for the following Reports based on the **Report Type**:

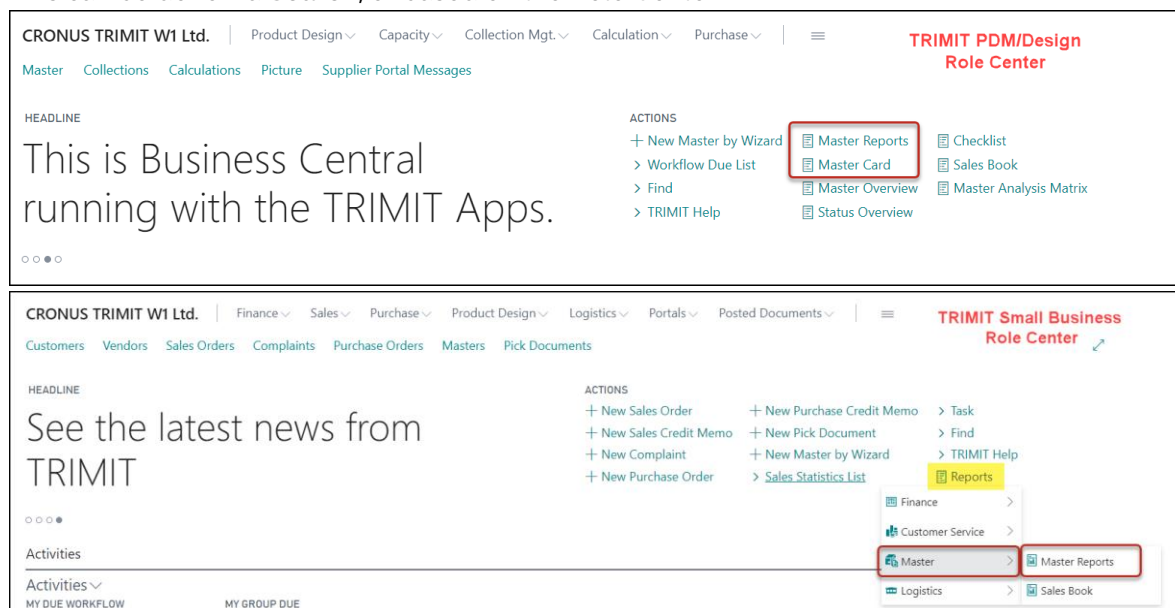

6037200	trm Master Card
6037203	trm Product Line View
6037204	trm Bill of Materials
6037205	trm Additional Info
6037206	trm Measurement Chart
6037207	trm Additional Comments
6037209	trm Composition and Care Label
6037310	trm Measurement Chart Land
6037211	trm Sustainability

You can make as many PDM Report Sets as you like, with all kinds of combinations of Reports.

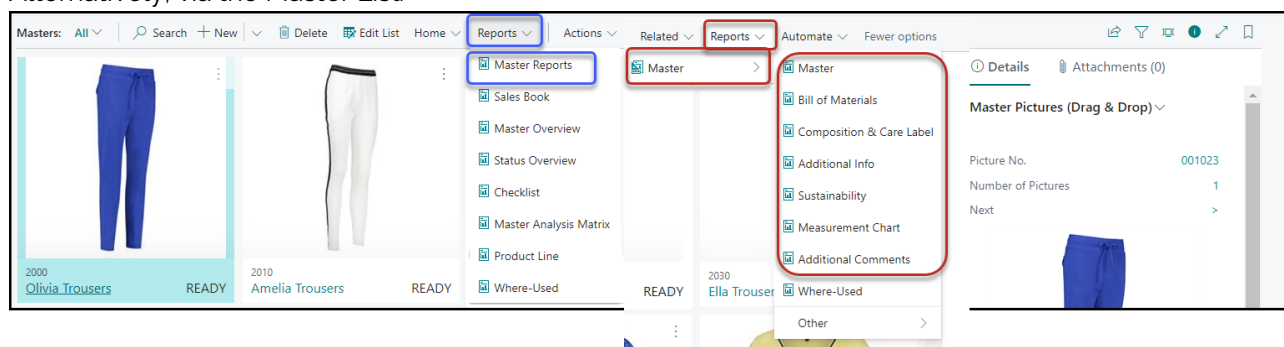

Printing individual PDM Reports

Besides using the **PDM Report Set** to print several PDM Reports at once, you are still able to print one of the PDM Reports individually.

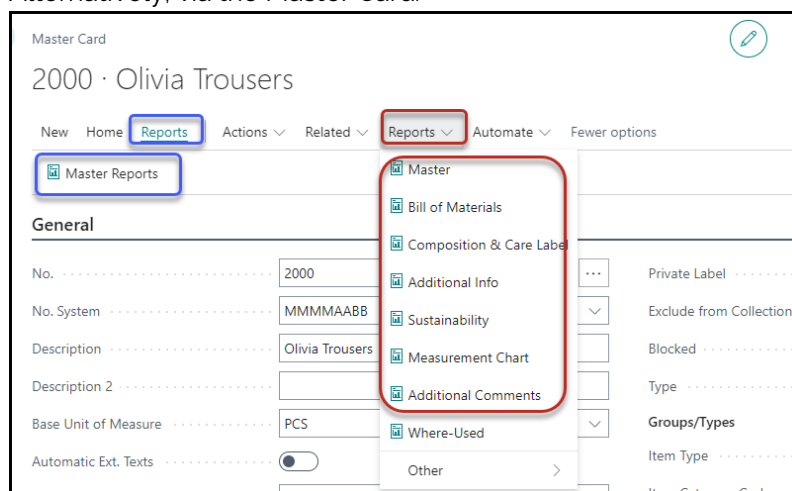

This can be done via **Search**, or based on the Role Center

Alternatively, via the Master List:

Alternatively, via the Master Card:

If no **PDM Report Set** has been created to determine the fields that should be printed in the header of the PDM Reports, the system will automatically use the following setup for the fields and will always print it in your own Windows Language.

1. Master No.
2. Master Description
3. Size Range
4. Item Statistics Group
5. Item Statistics Group 2
6. Item Statistics Group 3
7. Global Dimension 1
8. Global Dimension 2
9. Collection
10. Vendor

The header lines of the PDM Reports will then look like:

	Master Card		
	No.	2100	
	Description	Lily Blouse	
	Size Range	XS - 3XL	
	Design	One Color	
	Item Group	Blouses/Shirts	
	Gender	Women	
	Brand Code	Fashion	
	Season Code	Summer Current Year	
	Supplier		

As you can see, besides the **No.** only Descriptions/Names are printed.

The captions for **Item Statistics Group** (Design), **Item Statistics Group 2** (Item Group) and **Item Statistics Group 3** (Gender) depend on the **Caption Class Setup** setting.

The captions for the **Global Dimension 1** (Brand Code) and **Global Dimension 2** (Season Code) depend on the Names/Translations of the Dimensions

The line 9. with the **Collection**, will only be filled, if you also filtered on the Collection when you printed the PDM Report.
