Introduction

The **Digital Product Passport (DPP)** is a web page showing information of a product (**Item**). The information will come from the Item Card or from the Master Card and their related information.

The Digital Product Passport module enables TRIMIT users to configure and generate structured product datasets for external systems/persons — typically via a portal or API. It supports the EU Digital Product Passport regulation by allowing organizations to define which product information (Seller Details, Environmental Data, Certifications, Compositions, etc.) is published for each product.

For your Items, you need to create a QR code that should then be printed on the label of the Item. The QR code should be based on the URL for the DPP:

PD/LL/dpp/&no=XXXXX, where **PD** stands for your TRIMIT Portal Domain URL, **LL** stands for the Language and **XXXXX** stands for the Item No. or the System ID (GUID) of the Item No.

That way consumers can scan the QR code and see the DPP web page.

You are also able to see the outcome of the DPP via the Master (based on the first Item related to the Master) or via the individual Item itself, to check how it would look like.

The module works through a profile-based configuration: administrators define a DPP **Portal Profile**, select which data sections and individual fields to expose, and the system dynamically collects Field values from Items, Masters, Company Information, Vendor Information and TRIMIT's Additional Info/VarDim structures at runtime.

The DPP is related to **Items**. If the information you want to show is not available on the Item, but it is available on the related Master, it will show the information of the Master.

This is applicable for all the Fields/Information you want to show on the DPP.

Because it is always related to **Items**, it cannot be used for configurable Masters for which the actual sales product Item is based on a VarDim Order in a Sales Line.

The functionality is part of the **TRIMIT Sustainability App**, which needs to be installed besides the regular **TRIMIT App** and the regular **Sustainability App** of Business Central.

Furthermore, you do need to have at least the **TRIMIT e-commerce Essentials** (as of **SEP26** release) installed for the **DPP** and the **PIR** (Product Information Repository for specific related Pictures) to be able to see/show the DPP.

The audience for this document is the Consultant or very skilled User. It will only describe the TRIMIT fields/functionality and not the standard Business Central fields/functionality. Be aware of not changing settings and parameters in a live database without consulting the implementing partner.

The functionality described is the functionality as of **TRIMIT 26.1.61** for Business Central W1 BC28.X and the **TRIMIT Sustainability 26.1.1 App**.

The pictures in this White Paper are based on the demo data for **TRIMIT 26.1**, which is based on Microsoft Dynamics 365 Business Central 2026 Release Wave 1, in the demo company **CRONUS TRIMIT W1 Ltd.** (based on CRONUS International Ltd. of Microsoft Dynamics 365 Business Central).

Note

This White Paper is also applicable for **TRIMIT 25.2.60 App** and **TRIMIT Sustainability 25.2.4 App**

Components

TRIMIT Digital Product Passport contains the following objects:

The tables	6037737	<i>trm DPP Field Selection</i>
	6037738	<i>trm DPP Product</i>
	6037739	<i>trm DPP Product Field</i>
The pages	6037738	<i>trm DPP Portal Profile</i>
	6037746	<i>trm DPP Field Selection Part</i>
The codeunits	6037737	<i>trm DPP Events</i>
	6037738	<i>trm DPP Handling</i>
	6037739	<i>trm DPP Field Group Context</i>
Tabelextension	6037730	<i>trm Master Ext</i> extends 6037103 <i>trm Master</i>
	6037735	<i>trm Item Ext.</i> extends 27 <i>Item</i>
	6037736	<i>trm Collection Ext.</i> extends 6037035 <i>trm Collection</i>
Pageextension	6037730	<i>trm Sust. Master Card Ext</i> extends 6037108 <i>trm Master Card</i>
	6037731	<i>trm Sust. Master List Ext</i> extends 6037103 <i>trm Master List</i>
	6037733	<i>trm Sust. Item Card Ext</i> extends 30 <i>Item Card</i>
	6037734	<i>trm Sust. Item List Ext</i> extends 31 <i>Item List</i>
	6037739	<i>trm Sust. Collection Card Ext.</i> extends 6037170 <i>trm Collection Card</i>

Permissions

The Permission Set **TRM-SUSTAINABILITY** has been extended with the three Tables mentioned above.

The user that needs to setup the content of the DPP, also needs the permissions to Read, Insert, Modify, Delete the *Portal Profiles*. Permission set: **TRM-POR-ADMIN**.

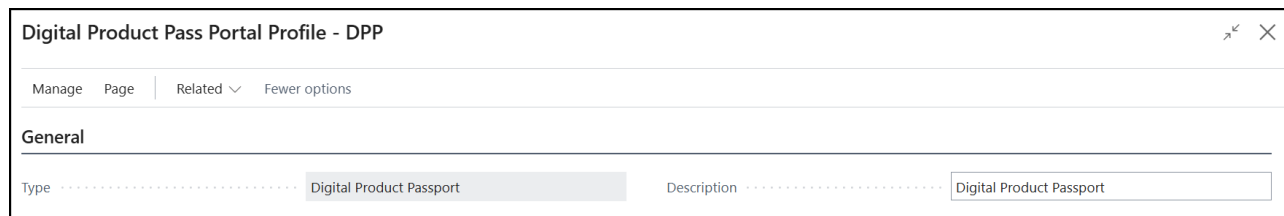

Setups in Portal Profile

To determine which information should be shown in the **Digital Product Passport** of an Item, you need to create a **Portal Profile** of the **Type *Digital Product Passport***.

Based on the chosen **Settings**, you can determine in detail which information should be shown.

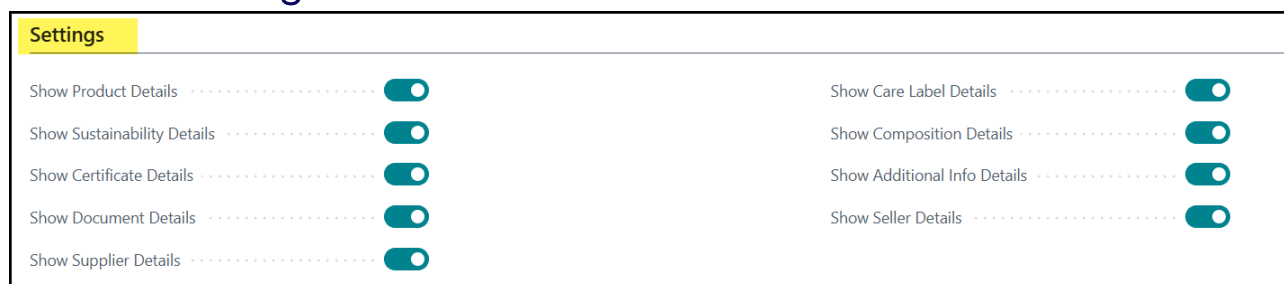

If the DPP cannot find the related information on the Item, it will search for the related information in the related Master.

FastTab General

After selecting the **Type *Digital Product Passport***, you can enter a **Description** for this Portal Profile.

FastTab Settings

Then you need to decide which information you want to share on your **DPP**.

Depending on these checkmarks, you will see the related **FastTabs** in which you can decide which data/information you want to show.

A checkmark will automatically set the *All xxxx Fields* of a specific FastTab, i.e., All *Product* Fields for the FastTab ***Product Details***, or All *Care Label* Fields for the FastTab ***Care Label Details***.

Choosing an *All xxxx Fields*, will overrule the specific fields you might have chosen – it will simply show all the information.

Show Product Details

You need to enter a checkmark to see this information.

You can determine in the FastTab ***Product Fields*** which specific Fields of an Item you want to show.

Show Sustainability Details

You need to enter a checkmark to see this information.

You can determine in the FastTab ***Sustainability Fields*** which specific Fields regarding **Sustainability** of an Item you want to show.

This can include the BC Sustainability Fields as well as the TRIMIT Sustainability information that you can add to an Item via ***Home, Sustainability***.

Show Certificate Details

You can determine in the FastTab ***Certificate Fields*** which specific Fields of a **Scope Certificate** (based on the **TRIMIT Sustainability App**) with **Show on Digital Product Passport** set to ***Certificate*** you want to show of an Item that is related to the **Scope Certificate**.

Show Document Details

You can determine in the FastTab *Document Fields* which specific Fields of a **Scope Certificate** (based on the **TRIMIT Sustainability App**) with **Show on Digital Product Passport** set to *Misc. Document* you want to show of an Item that is related to the **Scope Certificate**.

Note

For more information regarding the **Scope Certificates** see [Guide for TRIMIT Sustainability App](#)

Show Supplier Details

You can determine in the FastTab *Supplier Fields* which specific Fields of the **Vendor No.** of an Item you want to show.

Show Care Label Details

You can determine in the FastTab *Care Label Fields* which specific Fields of the **Care Labels** of an Item you want to show.

Show Composition Details

You can determine in the FastTab *Composition Fields*, which specific Fields of the **Composition** of an Item you want to show.

Show Additional Info Details

You can determine in the FastTab *Additional Info Fields*, which specific Fields of the **Additional Info** of an Item you want to show.

Show Seller Details

You can determine in the FastTab *Seller Fields*, which specific Fields of your own **Company** you want to show.

FastTab Product Fields

From an Item the following Fields will always be shown in the DPP:

Master No., Item No., Description and **Description 2**, and from the related Master the possible **Variant 1 - 5 Values** (i.e., Colors or Sizes).

Besides this information Fields, you are able to add extra Fields/Information (**Types**) of the Item that you want to show, but they will only be shown if the **Show Product Details** is **TRUE**.

Product Fields				
New Line Delete Line Field Translations				
Type	Description	Translated Description	VarDim Type No	
→ Statistics Group 1	Statistics Group 1	Design		
Gross Weight	Gross Weight			
Net Weight	Net Weight			
Country of Origin	Country of Origin

Statistics Group 2	Item Statistics Group 2	Item Group		
Statistics Group 3	Item Statistics Group 3	Gender		
Statistics Group 5	Item Statistics Group 5	Item Statistics Group 5		
Global Dimension 1	Brand Code	Brand Code		

You can determine which Fields/Information of the Item you want to show:

Option Lookup List			
Option Values ↑			
→	All Product Fields	Item Group	G2
	Brand Code D1	Item Statistics Group 4	
	Country of Origin	Item Statistics Group 5	
	Design G1	Net Weight	
	Extended Texts	None	
	Gender G3	Product Family	
	Gross Weight	Season Code D2	
	Item Category	Tariff Code	

You can choose the following:

- *All Product Fields* which will show all the possible Fields/Information that you can choose from an Item. This is the default **Option Value**.
- *None* will not show any extra Fields from an Item.

You will see the fields in alphabetical order, and based on the Captions:

In our demo company, that means:

D1 = Global Dimension 1

D2 = Global Dimension 2

G1 = Item Statistics Group 1

G2 = Item Statistics Group 2

G3 = Item Statistics Group 4

The default **Translated Description** for the **Item Statistics Groups 1 - 5** comes from the **Caption Class Setup**.

For every chosen Field/Information, you can determine a Translation (by clicking **Field Translation**) that should be shown in the DPP. I.e., for **Item Statistics Group 2**:

Translated Text Sheet

Which Masters/Items can have a DPP

Besides setting up the **Portal Profile** to determine the Information that should be shown in the DPP, you also need to determine for which Items you want to be able to show the DPP.

Some information shown in the DPP is related to Fashion Masters with Variants, like the Colors or Sizes, as well as the Composition.

But also, for Masters, for which the sold products (Items) are based on the VarDim Order of a Sales Line, you are able to show a DPP, however without specific information that is related to the Configuration of the sold product. I.e., the *3200 Sofa Helios 2 Seater* in our Demo Company:

If set to *TRUE*, the DPP can be shown of this Item.

The content of this field in the Item will overrule the content of the corresponding field in the Master.

How to show the DPP in TRIMIT

Via the Master List/Card

In the Master List/Card, via **Related, Portal, Digital Product Passport**, you can open the DPP.
This action is only active, if the Master has the **Show in Digital Product Passport** set to **TRUE**.

The screenshot shows the Master List interface. The 'Related' dropdown menu is open, displaying options: Master Data, Comments, Portal, Sales Receivables, Purchases, Warehouse, External Display, Enable Portal, Supplier Portal Messages, and Digital Product Passport. The 'Portal' and 'Digital Product Passport' options are highlighted with red boxes. The table below shows a list of items:

Item Type	No.	Description	Status Code	Brand Code
Finished Goods	2000	Olivia Trousers	READY	FASHION
Finished Goods	2010	Mia Trousers	READY	FASHION
Finished Goods	2020	Isla Trousers	READY	FASHION
Finished Goods	2030	Ella Trousers	READY	FASHION

The screenshot shows the Master Card interface for item 2000 - Olivia Trousers. The 'Related' dropdown menu is open, displaying options: Master Data, Comments, Portal, Sales Receivables, Purchases, Warehouse, External Display, Enable Portal, Supplier Portal Messages, and Digital Product Passport. The 'Portal' and 'Digital Product Passport' options are highlighted with red boxes.

Via the Item List/Card

In the Item List, via **Related, Portal, Digital Product Passport**, you can open the DPP.
This action is only active, if the Item has the **Show in Digital Product Passport** set to **TRUE**.

The screenshot shows the Item List interface. The 'Related' dropdown menu is open, displaying options: Item, Sales, Purchases, Production, External Display, Enable Portal, Supplier Portal Messages, and Digital Product Passport. The 'Portal' and 'Digital Product Passport' options are highlighted with red boxes. The table below shows a list of items:

No.	Item Type	Description	Description 2	Master No.	Inventory
20000144	Finished Goods	Olivia Trousers	White,44	2000	0
20000146	Finished Goods	Olivia Trousers	White,46	2000	0
20000148	Finished Goods	Olivia Trousers	White,48	2000	0
20000338	Finished Goods	Olivia Trousers	Snow,38	2000	0

In the Item Card, via **Related, Item, Portal, Digital Product Passport** you can open the DPP.
This action is only active, if the Item has the **Show in Digital Product Passport** set to **TRUE**.

The screenshot shows the Item Card interface for item 20000136 - Olivia Trousers. The 'Related' dropdown menu is open, displaying options: Item, Availability, Purchases, Sales, Production, Warehouse, External Display, Enable Portal, Supplier Portal Messages, and Digital Product Passport. The 'Portal' and 'Digital Product Passport' options are highlighted with red boxes.

Navigating in the Webpage of the DPP
