Introduction

Especially regarding Fashion products, we added extra **Product Data Management (PDM) Information** to the Masters:

- ➔ Additional Info
- ➔ Care Label
- ➔ Composition
- ➔ Sustainability
- ➔ Measurement Chart
- ➔ Additional Comments
- ➔ PDM Reports

The audience for this document is the Consultant or very skilled User. It will only describe the TRIMIT fields/functionality and not the standard Business Central fields/functionality. Be aware of not changing settings and parameters in a live database without consulting the implementing partner.

The functionality described is the functionality as of **TRIMIT 26.1 for Business Central W1 BC28.X**.

The pictures in this White Paper are based on the demo data for **TRIMIT 26.1**, which is based on Microsoft Dynamics 365 Business Central 2026 Release Wave 1, in the demo company **CRONUS TRIMIT W1 Ltd.** (based on CRONUS International Ltd. of Microsoft Dynamics 365 Business Central).

Components

TRIMIT Master Additional Info contains the following objects:

Master Related Information

Let us start with the general **Additional Info Lines**. Before we do so, we have to take one step back and discuss the setup of a Master.

In the Fashion Industry a Master represents a Model or a Style. This is a product that has different Variants, for instance Color/Size or Color/Waist/Length combinations. Perhaps there could be more Variants, like on Shoes a Sole Type or a Width (like Master *2700 Men's Brogue* in our Demo Data).

In the VarDim Master List of the Master we can setup, which VarDim Types should be attached to this Master. An example is found below of Master *2100 Lily Blouse*

VarDim Master List - 2100 - Lily Blouse							
Type	VarDim Type	Description	VarDim Type Placement in Item No.	Consistent Inheritance	Dimension 2	Search Unit Price Adjustment	
→ Variant	COLOR_1	Garment/Fabric Colors	Variant 1	☐	No	No	
Variant	SIZE_C	Casual Sizes XS - XXL	Variant 2	☐	No	No	

To these VarDim Types (of **Type Variant**) a Table is attached with Options. Some of these Options are valid; others are not. All possible combinations of the valid Options from the Variants of a Master, are represented by the regular Business Central Items. You could say that in the VarDim Master List of a Fashion product the VarDim Types are entered that are variables within the Master.

So far basic TRIMIT about setting up a Master.

Additional Info

Let us assume that we want to connect a VarDim Type to a Master with some Options in it.

However, within the same Master there is only one Option possible: the VarDim Option is not a variable anymore, but a **Constant**.

Examples of these are:

- ➔ Material Type
- ➔ Fit (Slim, Regular, Skinny, etc.)
- ➔ Sleeve Length
- ➔ Collar Type, Cuff Type, etc.
- ➔ Fire Resistance
- ➔ Waterproof
- ➔ Etc.

The idea is that we can enter these Constants into the **Additional Info** via the Master List/Card and via the Item List/Card

Master Card					
2100 · Lily Blouse					
Home	Reports	Actions	Related	Reports	Automate
Bill of Materials	Composition	Additional Info	New by Wizard	Attributes	Inventory Profile
Workflow	Care Label	Additional Tags	Copy Values	Collections	Statistics
Measurement Chart	Sustainability	Additional Comments	VarDim Master	Item List	Product Information (PIR)

Variant	A VarDim Type, with Type = <i>Variant</i> , and Limited Usage <i><Empty></i> or <i>Additional Info</i> can be entered.
Headline	A VarDim Type, with Type = <i>Headline</i> and Limited Usage <i><Empty></i> or <i>Additional Info</i> can be entered. But you can also enter a Free Text in the Description without choosing a VarDim Type. The Text lines are Bold.
Standard	A default set of Additional Info Lines that can be chosen (see Standard Sets of Wash & Care Labels).

Symbol

A Picture can accompany a VarDim Option. With the Boolean **Symbol** you can separate the Pictures that are a Symbol – for instance: symbol for Fire Resistance – from the other Pictures.

This could be used for instance on customized reports in which you want to print Symbols and other Pictures in a different size or different position.

VarDim Type

In this field you can enter the **VarDim Type** if the **Type** of the Additional Info Line is *Dimension*, *Variant* or *Headline*.

VarDim Type Name

This field is not by default shown; you need to add it via *Personalize*.

It shows the **Name** of the **VarDim Type**.

Value

In this field you can enter the **VarDim Variant Option** that acts as a Constant for this Master if the **Type** of the Additional Info Line is *Variant*.

If the **Type** is *Standard*, you can enter **Additional Info No.** for a default set of Additional Info Lines. In that case, those Lines will be shown in the FactBox *Additional Info*.

Description

This field will be filled with the **Description** belonging to the VarDim Option, but you can overwrite it manually.

Picture

This field shows you the **Picture** belonging to the chosen VarDim Option.

Additional Text

In this Field you can add **Additional Text**, but it will not be printed on the *PDM Additional Info* report; it is simply extra information.

Exclude Print

You can enter a checkmark in this field if you do not want this **Additional Info Line** printed on the *PDM Additional Info* report.

Exclude Portals

You can enter a checkmark in this field, if you do not want this **Additional Info Line** shown in TRIMIT e-commerce.

Actions

Copy

Via **Copy**, you can copy Additional Info Lines from other Masters or Items:

Copy Standard Lines

Via **Copy Standard Lines**, you can copy Additional Info Lines of **Type Standard**, from other Masters or Items:

You can select an **Additional Info No.** with **Additional Info Type Additional Info** and click **OK**.

Comments

Via **Comments**, you can enter Comments to the Additional Info Line that you are standing on. This can also be done via the FactBox **Comments**.

Actions/Clear Additional Text Lines

Via this Action, you can delete all the **Additional Text** fields in all the Lines at once.

Related

Card

Via **Card**, you can open the **Additional Info Lines** of the current Line in case the **Type** is *Standard*. (see [Standard Sets of Wash & Care Labels](#)).

FactBox

The FactBox **Additional Info** can be added to the Master List/Page via **Personalize**, and you can add extra fields to this FactBox – also via **Personalize**.

Therefore, it can also look as follows:

Additional Info				
VarDim Type	VarDim Type Name	Value	Pict...	Description
COLLARTYPE	Collar Type	4		Forward-Point
SLEEVE_LEN	Sleeve Length	4	+	Long Sleeve
CUFFSTYLE	Cuff Style	8		Two Button

Report

Via **Additional Info**, you can run the Report that has been set in the **Report Selection – PDM for Usage Additional Info**.

Two Button

The options for the layout of this report are described in *White Paper – TRIMIT PDM Report Set*.

Adding **Wash & Care** Information and **Composition** can be done in the same way as the Additional Info Lines. This is discussed in the next Chapters.

Care Label

Every Garment has a **Care Label**. On this Care Label several symbols are shown. These symbols can be accompanied by explanatory or other texts for instance the Composition. This could be multilingual. In the picture below, we see two examples of Wash & Care Labels.

In TRIMIT it is possible to add every individual Wash & Care symbol.
You can add the **Care Label** to a Master or an Item by clicking *Home, Care Label*:

Related Picture

FactBox *Related Picture* has been added via *Personalize*.

See [New](#) for a description of the New functions.
See [Description of the Fields](#) for a description of the fields on the Lines.
See [Actions](#) for a description of the Actions for the Lines.

FactBox

The FactBox *Care Label* can be added to the Master List/Page via *Personalize*, and you can add extra fields to this FactBox – also via *Personalize*.

Standard Sets of Wash & Care Labels

In TRIMIT it is possible to create **Standard** Sets of Wash & Care Labels. This can be extremely useful, if a company trades Products with a limited number of Fabric Compositions and therefore a limited combination for the Wash & Care Labels.

In this paragraph it is shown how a set of Wash & Care Labels can be set up and how it shows in the system.

Note:

Standard Set of Wash & Care Labels is just an example. In fact, every combination of VarDim Types and Values can be created as a Standard Set. Therefore, also for the **Additional Info** and **Composition** you can create Standard Sets that are often used.

On behalf of this example let us clear the Care Label Lines for Master *2100 Lily Blouse*.

In the field **Type** you can choose *Standard* indicating that you want to select a Standard Set of Wash & Care Labels. In this case we do not have any, so we have to create a new one. This is done via the column **Value**. The column **VarDim Type** remains blank.

You can define a standard set called i.e., *DEF_CL* with a **Description** and then you can enter the combination of **VarDim Types** with **Values** (VarDim Variant Options).

For instance, as in the screenshot below. Now this set of Wash & Care VarDim Types and Values is defined as a Standard Set.

Do not forget the checkmark in column **Symbol**. This checkmark determines if you see the Symbols on the *TRIMIT Care Label and Composition* report.

Care Label

Care Label · DEF_CL

Actions ▾ Automate ▾

Additional Info No. DEF_CL

Lines | New Line | Delete Line | Comments | Clear Additional Text Lines

Type	Symbol	VarDim Type	Value	Description	Picture	Additional Text
Variant	☒	CARE_1	40	Wash Warm-40°		
Variant	☒	CARE_2	00	Do not Bleach		
Variant	☒	CARE_3	20	Iron Medium(**)		
Variant	☒	CARE_4	20	Dry-Clean, Any Solvent Except Trichloroethylene		
Variant	☒	CARE_5	30	TumbleDry, Normal, Medium Heat		

The result is shown in the screenshot below. The content of the *Standard DEF_CL* will be shown in the FactBox *Care Label*, and in that FactBox, you can also *Edit* the content of this Standard Set.

Tumble Dry, Normal, Medium Heat

The options for the layout of this report are described in *White Paper – TRIMIT PDM Report Set*.

Composition

Every Garment has a **Composition** that shows the percentages of the materials in the Garment. You can add the **Composition** to a Master List/Card or an Item List/Card by clicking *Home, Composition*

The **Composition** of a Master/Item is always based on a VarDim Type with all the different Values that you can choose for the **Composition**. I.e.,

Composition Lines									
🔍 📄 New ▾ 📝 Edit List 🗑️ Delete 📋 Copy 📋 Copy Standard Lines 📄 Card 💬 Comments Actions ▾ Reports ▾ Automate ▾ Fewer options									
	Type	Part Item No.	VarDim Type	VarDim Type Name	Value	Description	Percentage %	Picture	Additional Text
→	Variant ▾		COMP	Composition Material Codes	PA	Polyamide	72	+	
	Variant		COMP	Composition Material Codes	EA	Elastane	28	+	
								+	

Type

The Field **Type** determines whether you can enter free text or a VarDim Type. You can choose between the following three options:

Type	Description
Variant	A VarDim Type, with Type = <i>Variant</i> , can be entered in the Composition Lines
Headline	Free Text can be entered in the Description. The Text lines are Bold.
Standard	A default set of VarDim Options can be chosen (see Standard Sets of Wash & Care Labels)

Note:

You can create a Standard Set for the Composition the same way as described in [Standard Sets of Wash & Care Labels](#) for a Standard Set of the Care Labels. This can save time if many of your Products have the same Composition.

Part Item No.

This field is not by default shown; you need to add it via *Personalize*.

In this field you can enter **Part Item No.**, which has the same Table as Part Item No. on the Bill of Materials. Using Part Item Nos., it is possible to fill the Composition for different parts of the Master, i.e., Body, Lining, Pocket, etc.

The **Part Item No.** plays an important role when you want to calculate the Composition from its individual Components of a Bill of Materials. This will be discussed in the next paragraphs.

VarDim Type

In order to enter the Composition Lines a **VarDim Type** is required that contains all kinds of materials.

In our Demo Data (on our Demo Sites and created with our **TRIMIT Data & Test App**) that is **COMP**.

In the accompanying Variant Table you can find all kinds of Fabrics, Fibers, Woods, Metals, etc.

Everything that has to do with the Material Type/Quality.

7							
VarDim Variant Option No. COMP    New  Edit List  Delete Actions ▾ Related ▾ Automate ▾ Fewer options							
Value ↑	Description	Short Description	Color Reference	RGB Code	No Image	Picture	Attribute Value
NA	Napa				☐	+	
NE	Neoprene				☐	+	
NI	Nickel				☐	+	
NR	Natural Rubber				☐	+	
NU	Nubuck				☐	+	
NY	Nylon				☐	+	
PA	Polyamide				☐	+	
PB	Polycarbamide				☐	+	
PC	Acrylic				☐	+	
PE	Polyethylene				☐	+	
PL	Polyester				☐	+	
PP	Polypropylene				☐	+	
PR	Protein				☐	+	
PS	Polystyrene				☐	+	
PU	Polyurethane				☐	+	
RA	Ramie				☐	+	
SE	Silk				☐	+	

It is possible to compose the **Composition** from specific materials. This is shown in the Composition Lines on the previous page of Master *2000 Olivia Trousers*, which consists of a Fabric with Composition of 72% Polyamide and 28% Elastane. In the Composition Lines this is represented as two lines: One for the Polyamide and one for the Elastane.

VarDim Type Name

This field is not by default shown; you need to add it via *Personalize*.

It shows the **Name** of the **VarDim Type**.

Value

In the field **Value** you need to choose a Value from the **VarDim Type**.

I.e., *PA* for Polyamide or *CO* for Cotton.

Percentage

In the field **Percentage** you can enter the percentage of the material

That is where you put the 72% and the 28% for the example above. The percentages can be calculated or used for calculations. This will be discussed in the next Chapters.

Additional Text

You can add additional text to this specific material. I.e., grams/meter to specify the Quality.

This Additional Text will also be printed on the Report *Composition & Care Label*.

Exclude Print

You can enter a checkmark in this field if you do not want this **Composition Line** printed on the *PDM Composition & Care Label* report.

Exclude Portals

You can enter a checkmark in this field, if you do not want this **Composition Line** shown in the TRIMIT e-commerce.

For a description of the [New](#) function or the Actions in the blue blocks: see [Actions](#).

Check Sum of %

Via **Actions, Composition, Check Sum of %**, you can check if the sum of entered percentages of the Composition is *100 %*.

In case of Composition of a product with multiple Components, the check will take place per **Part Item No.**

Therefore, if the Composition would be as follows because of two components in the Collar (Inside/Outside):

Composition Lines								
New Edit List Delete Copy Copy Standard Lines Card Comments Actions Automate Fewer options								
Type	Part Item No.	VarDim Type	VarDim Type Name	Value	Description	Percentage %	Picture	Additional Text
Variant	MAIN	COMP	Composition Material Codes	PA	Polyamide	70	+	
Variant	MAIN	COMP	Composition Material Codes	EA	Elastane	30	+	
Variant	COLLAR	COMP	Composition Material Codes	PA	Polyamide	70	+	
Variant	COLLAR	COMP	Composition Material Codes	EA	Elastane	30	+	
→ Variant	COLLAR	COMP	Composition Material Codes	CO	Cotton	100	+	
							+	
							+	

The **Check Sum of %** will give you two times the total:

Calculated % Sum for MAIN: 100

OK

Calculated % Sum for COLLAR: 200

OK

Suggest Compositions

A Garment may consist of different Fabrics. In TRIMIT it is possible to have the system generate a suggestion of the overall Composition of the Garment based on the Composition of the BOM Component Lines.

This function can be found via **Actions, Composition, Suggest Composition**.

Fewer options

Type	Part Item No.	VarDim Type	VarDim Type Name	Value	Description	Percentage %	Picture	Additional Text	Exclude Print	Exclude Portals
→ Variant	:	COMP	Composition M...	PA	Polyamide	70	+		☐	☐
Variant		COMP	Composition M...	EA	Elastane	30	+		☐	☐

If we go back to the **Composition Lines** of *2110* and click **Actions, Composition, Suggest Composition** we get a message which needs to be confirmed, after which we see the following result:

This function deletes the current composition and find compositions on the first level of the master BOM for 2110. Do you want to continue?

Yes

No

Type	Part Item No.	VarDim Type	VarDim Type Name	Value	Description	Percentage %	Picture	Additional Text	Exclude Print	Exclude Portals
→ Headline			—				+	Composition From Master M2010 Fabric 70% Polyamide, ...	☐	☐
Variant		COMP	Composition Materia...	PA	Polyamide	70	+		☐	☐
Variant		COMP	Composition Materia...	EA	Elastane	30	+		☐	☐

For each BOM Component Line of the Master *2110*, in this case only the Item *M2010*, **Composition Lines** will be created based on the **Composition Lines** of the Item (*M2010*) in the BOM Component Line as shown above.

Let us now have a look at a BOM that has more Components with different Compositions. Note that this BOM has been set up including the use of **Part Item No.**

Type	Part Item No.	Group Filter	No.	Description	Description 2	Quantity per	Unit of Measure Code	Search Expression
Item	BODY	FABRICS	M2010	Fabric 70% Polyamide, 30% Elastane		2	M	
Item	LINING	FABRICS	M2040	Fabric 100% Polyester		2	M	
Item	COLLAR	FABRICS	M2030	Jaguar Print 72% Polyamide, 28% Elastane		0.3	M	
→ Item	COLLAR	FABRICS	M2000	Fabric 72% Polyamide, 28% Elastane		0.3	M	
Item		THREAD	M2110	Thread 100% Polyester		4	M	

Let us see which **Composition Lines** are now suggested for *2110* based on this BOM.

So again, we click **Actions, Suggest Composition** in the Composition Lines of *2110*:

Type	Part Item No.	VarDim Type	VarDim Type Name	Value	Description	Percentage %	Picture	Additional Text	Exclude Print	Exclude Portals
→ Headline			—				+	Composition From Master M2010 Fabric 70% Polyamide, ...	☐	☐
Variant	BODY	COMP	Composition Materia...	PA	Polyamide	70	+		☐	☐
Variant	BODY	COMP	Composition Materia...	EA	Elastane	30	+		☐	☐
Headline			—				+	Composition From Master M2040 Fabric 100% Polyester	☐	☐
Variant	LINING	COMP	Composition Materia...	PL	Polyester	100	+		☐	☐
Headline			—				+	Composition From Master M2030 Jaguar Print 72% Polya...	☐	☐
Variant	COLLAR	COMP	Composition Materia...	PA	Polyamide	72	+		☐	☐
Variant	COLLAR	COMP	Composition Materia...	EA	Elastane	28	+		☐	☐
Headline			—				+	Composition From Master M2000 Fabric 72% Polyamide, ...	☐	☐
Variant	COLLAR	COMP	Composition Materia...	PA	Polyamide	72	+		☐	☐
Variant	COLLAR	COMP	Composition Materia...	EA	Elastane	28	+		☐	☐
Headline			—				+	Composition From Master M2110 Thread 100% Polyester	☐	☐
Variant		COMP	Composition Materia...	PL	Polyester	100	+		☐	☐

Note:

The Composition suggested from the BOM Component Lines are only based on the First Level BOM.

Test Composition

The screenshot shows the 'Composition Lines' window. The 'Actions' menu is open, displaying options like 'Clear Additional Text Lines', 'Composition', 'Check Sum of %', 'Suggest Composition', and 'Test Composition'. The 'Composition' and 'Test Composition' options are highlighted with red boxes.

Type	Part Item No.	VarDim Type	VarDim Type Name	Value	Description
→ Variant	:	COMP	Composition Material Codes	PA	Polyamide
Variant		COMP	Composition Material Codes	EA	Elastane

Via **Actions, Composition, Test Composition**, it is possible to check whether the Values of the VarDim Types (Material Codes) in the Composition Lines agree with the Composition of the BOM Component Lines.

If a code is missing, an additional Composition Line will be added.

Note:

It is only to check if the Material Code is there. It does not take Part **Item No.** into consideration.

Suppose the BOM looks as follows for Master *2110 Mia Blouse*:

2110 · Mia Blouse									
BOM Component Lines									
Type	Part Item No.	Group Filter	No.	Description	Description 2	Quantity per	Unit of Measure Code	Sea	
Item	BODY	FABRICS	M2010	Fabric 70% Polyamide, 30% Elastane		2	M		
Item	LINING	FABRICS	M2040	Fabric 100% Polyester		2	M		
→ Item	:	COLLAR	FABRICS	M2055	Fabric 100% Cotton	0.3	M		

This means that we can expect on the Composition Lines the following **Material Codes**:

- CO (Cotton)
- PA (Polyamide)
- PL (Polyester)
- EA (Elastane)

Let us go to the Composition Lines of *2110* and make sure that we only have a line with **Material Code CO** (Cotton) in it.

Composition Lines									
✓ Saved									
Type	Part Item No.	VarDim Type	VarDim Type Name	Value	Description	Percentage %	Picture	Additional Text	Exclude Print
→ Variant	:	COMP	Composition Materia...	CO	Cotton	100	+		☐
							+		

Now click **Actions, Composition, Test Composition**. We can see now that the missing Material Codes are added. If necessary, the Composition Line with **Type Headline** can be deleted.

Composition Lines								✓ Saved
🔍 📄 New ⌵ Edit List Delete Copy Copy Standard Lines Card Comments Actions Automate Fewer options								
Type	Part Item No.	VarDim Type	VarDim Type Name	Value	Description	Percentage %	Picture	Additional Text
→ Variant		COMP	Composition Materia...	CO	Cotton	100	+	
Headline			—				+	Codes from the master BOM missing in the current composition.
Variant	BODY	COMP	Composition Materia...	PA	Polyamide	70	+	Composition From Master M2010 Fabric 70% Polyamide, 30% Elasta...
Variant	BODY	COMP	Composition Materia...	EA	Elastane	30	+	Composition From Master M2010 Fabric 70% Polyamide, 30% Elasta...
Variant	LINING	COMP	Composition Materia...	PL	Polyester	100	+	Composition From Master M2040 Fabric 100% Polyester

Note:

You will only see a Material Code once! The additional text only shows the line with the Master in which the **Material Code** appears first. If this is undesired it is better to use *Check Sum of %*.

Note:

If there are more BOM Component Lines in the BOM with Composition Lines, the percentages do not necessarily add up to 100 %

If the Material Codes of the Composition of the BOM Component Lines agree with the Material Codes on the Composition Lines of the main Product, we will get the message below:

FactBox

The FactBox *Composition* can be added to the Master List/Page via *Personalize* and you can add extra fields to this FactBox – also via *Personalize*.

Therefore, it could also look as follows:

Composition			
Part Item No.	Value	Percentage %	Description
MAIN	PA	72	Polyamide
MAIN	EA	28	Elastane
CORD	PA	72	Polyamide

Report

Via *Reports, Composition & Care Label* you can print the report based on the **Report Selection – PDM** with **Usage Composition**, in which also a Standard Set will be printed.

The options for the layout of this report are described in *White Paper – TRIMIT PDM Report Set*.

Sustainability

Sustainability is becoming more and more important. Especially when companies need to report on their environmental, social, and governance (ESG) impacts.

Besides the standard Business Central Fields that can be filled in on Masters and Items, in TRIMIT you can also add Certificates and impact on Masters and Vendors via **Sustainability**.

TRIMIT can also fill in more regarding your Certificates in the special **TRIMIT Sustainability App**.

For more info regarding the **TRIMIT Sustainability App**, see *Guide for TRIMIT Sustainability App* which can be found in [AddOn Apps](#).

You can add the **Sustainability** to Master List/Card or an Item List/Card by clicking *Home, Sustainability*:

The image shows two screenshots of the TRIMIT software interface. The top screenshot is the 'Master Card' for '2100 · Lily Blouse'. It features a top navigation bar with 'Home', 'Reports', 'Actions', 'Related', 'Reports', 'Automate', and 'Fewer options'. Below this is a grid of icons for various functions. The 'Sustainability' icon, which depicts a cloud with a leaf, is highlighted with a red rectangle. The bottom screenshot is the 'Item Card' for '21002001 · Lily Blouse'. It has a similar top navigation bar. In its grid of icons, the 'Sustainability' icon is also highlighted with a red rectangle.

You can also add the **Sustainability** to a Vendor List/Card by clicking *Related, Vendor, Sustainability*.

The image shows the 'Vendor Card' for '2000 · Sewing & Stitching Lda.'. The top navigation bar includes 'Home', 'Request Approval', 'New Document', 'Vendor', 'Prices & Discounts', 'Report', 'Actions', 'Related', 'Reports', and 'Automate'. The 'Related' dropdown menu is open, showing options like 'Vendor', 'Purchases', 'Documents', and 'History'. The 'Vendor' option is highlighted with a red rectangle. Below the menu, the 'Sustainability' icon (cloud with leaf) is also highlighted with a red rectangle. The main area of the card shows fields for 'No.' (2000), 'Name' (Sewing & Stitching Lda.), and 'Blocked' status.

For the Certificates, you can create a **VarDim Type** of the **Type Variant**, with all possible Certificates and their logos.

For the impact, you can create **VarDim Types** of the **Type Dimension**, so you are able to enter the quantity. I.e.:

VarDim Types: All

Type	No. ↑	VarDim Variant	VarDim Type Name	Dimensi... 2	Limited Usage	VarDim Attribute Name

Measurement Chart

Regarding your Products, you can enter all kinds of measures related to specific Sizes, like i.e., Waist, Hip, Length, Sleeve, etc. Therefore, you can use the **Measurement Chart**, which uses VarDim Types of **Type Dimension** to specify the measures related to the Sizes.

You can find the **Measurement Chart** only on the Master List/Card via *Home, Measurement Chart*.

Measurement Version

You can create several Versions of a Measurement Chart, and the Version can only be an Integer. I.e., for an Original Design, Sample1, Sample2, etc. By pressing **Alt+Arrow Down** in this field you open the page for the **Measurement Chart Versions**:

Measurement Chart Versions - Master · 2100 · 0							
Chart No. ↑	Name	Collection No.	Shipment Group	Brand Code	Season Code	Locked	
→ 0	Original Design					☒	
1	Design SS-CY	SS-CY				☐	
2	Design FW-CY	FW-CY				☐	

TRIMIT

WHITE PAPER: MASTER PDM INFORMATION

Date: July 21, 2026

© TRIMIT Group. All rights reserved.

Page 30

If you enter a **Collection No.** or **Shipment Group**, a **Global Dimension 1** and/or **2** (shown as *Brand Code* and *Season Code* based on the settings in TRIMIT Demo Data), you can use it as a filter for the report of the **Measurement Chart** to determine which Version you want to print.

A checkmark in **Locked** means that you are not allowed to change the measures anymore for this Version. You will also get an error message if you try to do so:

Measurement Chart Lines										
New Line Delete Line New by Wizard Comment										
Type	Type No.	Name	Set Measure	Tolerance	XS	S	< M >	L	XL	XXL

Dimension	TOP_D	Hip (cm)			89.00	93.00	97.00	101.00	105.00	109.00

Measurement Name

It is shown automatically based on the **Name** of the **Measurement Version**.

Collection Filter

This field can be used to filter the **Measurement Char** (Version) numbers that you can choose. It will show the Versions with this specific **Collection No.** and the Versions with no **Collection No.** filled.

Show Measurement Type

This will determine how the measures in the matrix will be shown.

You can choose between the following four options:

Measurement	This will show the actual measures you have entered into the cells of the matrix.
Grading (Accumulated)	This will show the differences of measures between the Size in the column and the Grading Point Size (Sample Size).
Grading (Relative)	This will show the differences of measures between the Sizes – so between every two Sizes individually.
Only Grading (+ Custom)	This will only show the Grading Point Size (Sample Size) and the extra added Columns in the Matrix of the measures.

Is grading on all measurements to be updated with 2 (excl. special columns)?

Yes

No

If you click Yes, the measures will be updated.

Measurement Chart Lines											
New Line Delete Line New by Wizard Comment											
Type	Type No.	Name	Set Measure	Tolerance	XS	S	< M >	L	XL	XXL	3XL
Date	DATE	Date									
→ Dimension	TOP_A	BackLength (cm)			-1.50	-1.50	66.00	1.50	1.50	1.50	1.50
Dimension	TOP_B	Chest (cm)			-4.00	-4.00	87.00	4.00	5.00	5.00	6.00
Dimension	TOP_C	Sleeve Length (cm)			-0.30	-0.30	59.90	0.30	0.30	0.30	0.30
Dimension	TOP_D	Hip (cm)			-4.00	-4.00	97.00	4.00	5.00	5.00	6.00
Dimension	TOP_E	Waist (cm)			-3.00	-3.00	72.00	3.00	4.00	4.00	5.00

Tolerance

You can enter a **Tolerance** that you would accept between an actual measure and a designed measure. This is only informative; there are no consequences if there is a bigger difference than Tolerance. In the cells of the Measurement Chart, you can enter the measures (Length, Width) directly into the cells.

But if you want to add a measure like 87-88.5, that is also possible if you start with a single quote ' So, if you enter '87-88.5 it will be shown in the cell as:

Measurement Chart Lines											
New Line Delete Line New by Wizard Comment											
Type	Type No.	Name	Set Measure	Tolerance	XS	S	< M >	L	XL	XXL	3XL
Dimension	TOP_A	BackLength (cm)			62.00	64.00	66.00	68.00	70.00	72.00	74.00
→ Dimension	TOP_B	Chest (cm)					87.5-89				
Dimension	TOP_C	Sleeve Length (cm)			59.30	59.60	59.90	60.20	60.50	60.80	61.10
Dimension	TOP_D	Hip (cm)			89.00	93.00	97.00	101.00	106.00	111.00	117.00
Dimension	TOP_E	Waist (cm)			66.00	69.00	72.00	75.00	79.00	83.00	88.00

But if it is the **Grading Point** you cannot work with the **Set Measure** functionality. The system will interpret it as a Text and not as a Number.

In the **Type No** (VarDim Type) that you choose on the Line, you can also set a **Default Tolerance** (**Measurement Chart**) like i.e., +/- 1.5; this means when adding this VarDim Type to the Line the **Tolerance** will be filled automatically.

Description	Grading Point	Set Hide	Standard	Compare With	Copy from Column
XS	☐	☐	☒		
S	☐	☐	☒		
M	☒	☐	☒		
L	☐	☐	☒		
XL	☐	☐	☒		
XXL	☐	☐	☒		
3XL	☐	☐	☒		
→ SAMPLE1	☐	☐	☐	03 [M]	03

By entering a checkmark in **Grading Point** this specific Size is set as the "Sample Size", for which the measures will always be shown, and that is used for **Grading (Accumulated)** to show the differences to this **Grading Point**.

The **Descriptions** show the Descriptions of the Sizes, and a checkmark in **Standard** indicates that this is a Size from the Master.

You are also able to set a checkmark in **Set Hide**. This will hide this specific Size in Measurement Chart and in the Report.

You are also able to add extra **Descriptions** (being extra Columns in the Matrix of the Measurement Chart), for which you can enter a **Compare With** (Size) and a **Copy from Column** (Size). The **Compare With** will be used to show the differences between the measure in the extra Column and the **Compare With** Size measure. The **Copy from Column** will copy the measures of that particular Size into the new Column after you have confirmed the following message:

After you entered the measures for the new Column, you will see the differences with the **Compare With**.

Comments

Comment

Size M is sample size

The fields in the **Blue** frame are added via *Personalize*.

Description of the Fields:

Date

The **Date** on which the Additional Comment was created.

Code

A unique **Code** for this type of Comments.

You can divide your Additional Comments by using the **Code**:

Select - Group Codes - Additional Comments				
🔍 ⌵ + New ... ⓘ ↗ ✕				
Code ↑		Description	Description 2	Supplier Portal
→ ACCESS	⋮	Accessories Comments		Read
CUSTOMER		Customer Comments		Read
DESIGN		Design Comments		Read
LABEL		Label Comments		Read
PACKING		Packing Comments		Add
PRODUCTION		Production Comments		Create
PROTO		Prototype Comments		Add
PURCHASE		Purchase Comments		Create
QUALITY		Quality Comments		Read
SALES		Sales Comments		No Access
WEB		Web Comments		No Access

Description/Description 2

You can enter a **Description** and **Description 2** (added via *Personalize*) for this **Code**.

Supplier Portal

When using the **TRIMIT Web Supplier**, you can determine if this **Code** should be shown, and if the Vendor should be able to add extra Comments to a **Code**.

This field is not shown by default; you need to add it via *Personalize*.

You can choose between the following four options:

No Access	The Vendor is not able to see these Additional Comments.
Read	The Vendor is able to read the Additional Comments.
Add	The Vendor is able to add extra Comment Lines to an existing Date/Code .
Create	The Vendor is able to create new Additional Comments for a new Date/Code .

Description

Production Comments

Date	Comment
4/22/2025	Size M is sample size
	Three Labels:
	Size Label: in the middle of the neck
	Brand Label: in the right seam 5 cm from the bottom
	W&C Label: in the left seam 5 cm from the bottom

Add Comment

Upload image

Select

The **Description** of the **Code** will be shown, but you can change it.

This Boolean will be set to *TRUE* automatically after you added the Comment Lines by clicking *Comments*.

User ID

This will be filled automatically with the **User** that created the **Data/Code** of the Additional Comments.

You can enter a **Collection No.** for this specific Additional Comment.

This can also be used when filtering the Codes you want to print on the report of the **Additional Comments**.

You can enter a **Shipment Group** for this specific Additional Comment.

You can enter Global Dimension 1 (Brand Code) and/or Global Dimension 2 (Season Code) for this specific Additional Comment.

You can choose if you want to show the Additional Comments **Date/Code** in the FactBoxes *Additional Comments* and *Additional Comment Lines* in the Measurement Chart.

You can choose between two options: *Yes*, or *Yes (Show in top)*.

The option *Yes (Show in top)* will show this **Date/Code** first in the FactBoxes.

If you leave this field empty, the current **Date/Code** will not be shown in the FactBoxes.

You can choose if you want to show the Additional Comments **Date/Code** in the FactBoxes *Additional Comments* and *Additional Comment Lines* in the BOM Component Lines.

You can choose between two options: *Yes*, or *Yes (Show in top)*.

The option *Yes (Show in top)* will show this **Date/Code** first in the FactBoxes.
If you leave this field empty, the current **Date/Code** will not be shown in the FactBoxes.
